# REPORT ON THE

# FOURTH CENSUS OF CANADA, 1901.

*To His Excellency, the Right Honourable Sir Gilbert John Elliot, the Earl of Minto G.C.M.G., &c., &c., Governor General of Canada.*

MAY IT PLEASE YOUR EXCELLENCY,—

I have the honour to lay before Your Excellency the first volume of the Report on the Fourth Census of Canada, 1901.

Respectfully submitted.

SYDNEY FISHER,
*Minister of Agriculture.*

OTTAWA, February 26, 1902.

# REPORT ON THE

# FOURTH CENSUS OF CANADA, 1901.

To the Honourable

SYDNEY FISHER,

*Minister of Agriculture.*

SIR,—I have the honour to submit herewith the first volume of the Report on the Fourth Census of Canada, 1901.

ARCHIBALD BLUE,

*Special Census Commissioner.*

THE CENSUS OFFICE,

OTTAWA, February 26, 1902.

# ERRATA

Page 147—In the column of Total, line 45, read 43,221 instead of 43,222, and line 46 read 2,796 instead of 2,795.

Page 172—In the column of Anglicans for district 188, Rimouski, read 55 instead of 355.

Page 178—In the column of Lutherans for district 180, Pontiac, read 431 instead of 432.

Page 284—In the totals of Canada, for Others of British Origin in the fourth column, read 13,421 instead of 13,415.

Page 285—In the totals of Canada read 28,621 Russians instead of 28,612; 34,473 Half-breeds instead of 24,481; and 93,459 Indians instead of 93,460.

Page 315—In the totals of Ontario read 4,584 Russians instead of 4,575; 4,995 Half-breeds instead of 5,003; and 19,670 Indians instead of 19,671.

Page 399—In the last column, line 30, read 1 instead of blank.

# FOURTH CENSUS OF CANADA 1901

## INTRODUCTION

The Census of 1891 was taken with nine schedules of 216 questions, and the Census of 1901 with eleven schedules of 561 questions, as shown by the following comparative table:

| No. | 1891. | Q. | No. | 1901. | Q. |
|---|---|---|---|---|---|
| I | Living persons | 25 | I | Living persons | 34 |
| II | Deaths and public institutions | 13 | II | Buildings and lands, churches and schools | 35 |
| III | Real estate, orchard products, nurseries, vineyards and market gardens. | 23 | III | Deaths | 15 |
| IV | Farm products | 30 | IV | Farm land, fruits and plantations | 37 |
| V | Live stock, animal products, home-made fabrics, furs and farm labour. | 27 | V | Field products | 37 |
| VI | Industrial establishments | 23 | VI | Live stock and animal products | 26 |
| VII | Forest products | 22 | VII | Agricultural values | 25 |
| VIII | Shipping and mining | 23 | VIII | Manufactures | 67 |
| IX | Fisheries | 30 | IX | Forest products and furs | 51 |
| | | | X | Fisheries | 130 |
| | | | XI | Mines | 104 |
| | Total | 216 | | Total | 561 |

Besides the foregoing, there were used in the Census of 1901 four special forms for obtaining records of (*a*) persons temporarily absent, (*b*) persons such as boarders and lodgers not present when the enumerator called and of whom particulars could not be given by the head of the household, (*c*) cheese and butter products, and (*d*) manufactures of clay products.

The schedule of living persons in 1891 contained inquiries which aimed to elicit for each person enumerated the place of birth of father and mother, his origin if French Canadian, and if he was unemployed during the week preceding the Census: and, if an employer, the number of hands employed during the year.

These questions do not appear in the corresponding schedule for 1901, but there are inquiries to ascertain the country or place of birth of each person, the year of immigration to Canada if born elsewhere, the year of naturalization if not a British citizen by birth, and his racial origin and nationality. There are also inquiries to ascertain for every trade, occupation and profession the time each person was employed and the amount of his earnings in the year.

Under the head of education and language, persons were asked in 1891 if they could read and write; in 1901 there are additional questions as to time at school in the year and the language spoken. English and French being official languages of the country, a special record has been taken to show if the person speaks one or both of these, and also his mother tongue if spoken. In a country peopled with so many foreign elements as Canada, it is desirable to know if they are being absorbed and unified, as may appear by their acquirement of one or other of the official languages. And as English is now in a very large degree the language of commerce throughout the world, it is also desirable to ascertain to what extent citizens of French origin are able to speak it in addition to their own.

The inquiry relating to time at school refers only to children of school age, and it is supplemented in schedule II of this Census by questions as to number of rooms, teachers and scholars in the public schools. There are also in this schedule questions supplemental to religion, as to Sunday schools and houses of worship, the object of which is to procure statistics of such institutions by religious denominations.

But schedule II of this Census has for its chief object a record of buildings and lands, and its starting point is such a description of the place of habitation of each person as will enable one to locate it on any good map or plan of the district or ascertain its place on the ground. In this way if any house has been missed or overlooked by an enumerator, or recorded more than once, or if a house has been recorded which does not exist, it is easily possible upon investigation to discover the fact; and each place of habitation is connected directly with the head of the household in the first schedule. This provision was wanting in 1891, and if improper entries were made by an enumerator detection was extremely difficult, particularly in the large cities and towns where the population is less stable than in the rural parts and where, as often happens, a man does not know even by name one-half of his neighbours living in the same block.

The provisions for recording the number of dwelling houses, institutions, stores, warehouses, factories, etc., and the extent of lands owned or leased, were nearly the same in the schedules of both censuses, but were more specialized in 1901 than in 1891.

The same observation will apply to the mortality schedules, the number of inquiries being 10 in 1891 and 15 in 1901.

In the farm schedules 75 questions were asked in 1891 and 127 in 1901. In those of the latter are included four questions relating to farm buildings, 12 to classified areas of farm land, 22 to orchard trees, vines and fruits, 37 to field crops, 26 to live stock and animal products, and 23 to values of lands, buildings, field and fruit crops and farm labour. And as no system of agricultural enumeration is satisfactory which does not take account of the areas devoted to agricultural purposes, the schedules are framed to procure as far as practicable the acreage as well as the production of every crop.

In the case of orchards and vineyards, however, extent alone may be misleading, as a growth of several years is necessary to mature them for fruitage, and therefore the inquiry extends to the number of bearing and non-bearing trees and vines.

Provision has been made for the first time in a Dominion Census for collecting figures of farm values, and it can be promised that the data obtained will present striking confirmation of the greatness of our agricultural industry and of the leading place it occupies in the development of national wealth.

In this Census no attempt has been made to collect the production of home-made fabrics and cheese, for as a result of the factory system these domestic industries have become nearly extinct.

The schedule for collecting information on the manufacturing industries is framed to suit present-day conditions, as well as to procure the quantities and values of products. It is therefore more specialized than the schedule of ten years ago, and the number of questions asked is more than trebled.

The anomaly of treating as a manufacturing establishment every room or workshop in which one or two persons are employed should not be entertained when the whole tendency of industries is towards the concentration of capital, management, skill and labour. No doubt there are reasons for desiring to know the variety and value of individual employment; but in any well conceived scheme for collecting the data of manufactures regard should be had for the idea of a factory as a modern going concern. It should have limitations, as the idea of a farm has limitations, and no one would dream of reckoning with a garden patch as a farm. Accordingly, after careful consideration, it was decided to adopt the interpretation given to the term in the statutes of those Provinces in which provision has been made for a system of inspection of factories by state officers.

The questions in the schedule relating to the fixed and working capital of establishments and the months they were in operation during the Census year, to the number and earnings of officers or managers and employees, to the aggregate working time of employees, to the cost of rent, fuel, light, power and taxes, to the quantities, kinds and values of raw materials used and articles produced, and to the class and capacity of power owned, are designed to show not alone the scope and extent of manufactures in the country, but also to furnish information which may be valuable to the legislator and instructive to the student of economics. In other words, the object is to ascertain the status of the manufacturing industries and the conditions under which their existence is maintained.

The manufacture of butter and cheese has interests separate from other industries, and the data concerning it have been collected with a special form.

The schedule of the products of the forest used in this Census has for its object the collection of quantities and values of raw materials prepared in the forest with such tools as the axe and the saw. The production of lumber, shingles, etc., comes properly under the head of manufactures.

The questions have been framed to conform closely with the forest products of the country as shown by the Trade tables of exports, and in this relation it is worth noting that with the disappearance from the older parts of the country of pine, oak, walnut

and other woods valuable for the production of lumber a demand has arisen for numerous other varieties of woods for purposes which are almost endless. The pulpwood industry may be taken as the leading example of this new situation; but there are many others, and it is probably true that woods of the Canadian forests formerly considered worthless and fit only to be burnt in the log heaps may prove to be sources of larger income to land owners than all our past and existing wealth of pine, oak and walnut.

Ten years ago the records of the forest industry were gathered with 22 questions, and now 60 are asked.

The fisheries schedule contains 100 more questions than in 1891, and is largely based on the schedule used by the Department of Marine and Fisheries, with such additions and alterations as are required to conform with the general scheme of the Census.

The inquiries relate to the number, tonnage and value of fishing craft, the kinds, number and value of fishing materials, the number and value of curing and canning establishments, the hands employed in the industry and their earnings, and the yield and value in detail of fishery products in the Census year.

By the use of a schedule with which in its leading features the fishermen are familiar, and the employment of agents to collect the information who understand the industry and who in other relations have the confidence of the fishermen, very full details have been gathered in such a shape as to make the work of tabulation easy. In Ontario, where the administration of the fisheries is chiefly in provincial control, the services of the officer in charge there have been enlisted, and in Quebec also local officials having the overcharge of provincial fishery interests have been employed where they were available. But in the more extensive fisheries of the Atlantic and Pacific coasts, as well as in the Territories, many of the agents have been selected from officers in the Marine and Fisheries service.

In the previous Census no use was made of the returns procured with schedule IX, which aimed at little more than collecting information on the plant employed, the capital invested and earnings of the fishermen.

The schedule of mining and mineral-products is framed to procure for each mine or quarry the extent and value of mineral-bearing and non-mineral lands occupied to carry on mining operations, the number, kind and capacity of treating works and value of buildings and plant, the number of officers, miners and other employees and the salaries and wages paid to the several classes during the year, the quantity and value of ore or mineral won, the quantity treated at mines or works, and the quantity and value of the products of treated ore or mineral. These questions relate respectively to metalliferous and non-metalliferous mines and works. Quantities and spot values are required for all mineral products; but in the case of ores and minerals subjected in treatment to a manufacturing process, as in the production of pig iron, petroleum oils, cements, plaster and salt, the details are collected by the schedule for manufactures; and in the case of brick, tile, pottery and other clay products by a special form of fewer and simpler questions.

There are three inquiries in the special form for obtaining the record of persons temporarily absent, 29 in the one for manufactures of clay products, and 30 in the one for manufactures of butter and cheese. These, added to the inquiries contained in the regular schedules, make a total of 623, or 407 more than the number of inquiries contained in the schedules employed in taking the Census of 1891.

To take the Census of the country speedily and successfully, with inquiries on so many lines, it was deemed necessary to employ a larger force of enumerators than formerly, and therefore to reduce the area to be assigned to each one. And as the primary object of a Census is to count the people for the readjustment of representation in Parliament, the polling division with boundaries as arranged for the general elections of 1900 was taken as the unit of enumeration.

The enumeration proper was conducted with the help of 17 chief or supervising officers for the Provinces and Territories, of 351 directing and revising commissioners and assistant commissioners for the Census districts, and of 8,800 enumerators for the polling divisions, each of whom was required at the beginning and end of his service to take and subscribe an oath regarding the faithful and exact discharge of his duties.* In the Census of 1891 there were employed 14 chief officers, 241 commissioners and 4,324 enumerators. The additional chief officers of 1901 were appointed for the unorganized Territories, being one for Keewatin, one for Athabaska and Mackenzie and one for Yukon, each of whom directed a staff of enumerators in taking the Census at trading posts and all other centres of population in those far distant and sparsely inhabited regions.

The enumeration in the field was required to be completed within thirty days from 31st March, but it was part of the duty of commissioners to revise all schedules before transmitting them to the Census Office, and this work necessarily occupied a considerable time. Yet, although the number of inquiries was nearly three times more than in 1891, the returns were made with gratifying promptness. Ten per cent of all schedules was received before the end of April, 58 per cent before the end of May, 83 per cent before the end of June, 95 per cent before the end of July, and 98 per cent before the end of August,—the remainder being chiefly returns for the unorganized Territories and the northern parts of British Columbia. But in the case of the last named region the Census had to be taken a second time, as the first schedules were lost with the foundered steamer "Islander." In 1891, one per cent of the schedules was received before the end of April, 41 per cent before the end of May, 83 per cent before the end of June, 96 per cent before the end of July, and 99 per cent before the end of August.

The following table shows, by Provinces and organized Territories, the number of districts and sub-districts into which the Dominion was divided for Census purposes in 1891 and 1901, together with the number of enumerators employed in Census work for each year :—

---

*The forms of oaths (No. 3 and No. 6) taken by each enumerator at the commencement and close of his service are respectively as follows :—

No. 3. I————————duly appointed under the Census Act, chapter 58, Revised Statutes of Canada, 1886, to be an enumerator for the taking of the Census, solemnly and sincerely swear that I will to the utmost of my skill and ability, faithfully and exactly discharge all and every my duties as such in conformity with the requirements of the said Act, and all Proclamations, Orders in Council and instructions issued in pursuance thereof. So help me, God.

No. 6. I————————duly appointed under the Census Act, chapter 58, Revised Statutes of Canada, 1886, to be an enumerator for the taking of the Census in Census sub-district————in Census district No.———, do solemnly and sincerely swear to the exactness of the record, as revised and corrected, delivered into the hands of the Commissioner of the said district, which record is, to the best of my knowledge, a fair and honest statement of the facts sought for by the Census Act, and in accordance with instructions given to me. So help me, God.

| Provinces and Territories | Districts. | | Sub-districts. | | Enumerators. | |
|---|---|---|---|---|---|---|
| | 1901. | 1891. | 1901. | 1891. | 1901. | 1891. |
| Alberta | 1 | 1 | 134 | 3 | 139 | 24 |
| Assiniboia | 2 | 2 | 188 | 6 | 186 | 43 |
| British Columbia | 5 | 5 | 35 | 50 | 276 | 85 |
| Manitoba | 7 | 5 | 94 | 100 | 574 | 109 |
| New Brunswick | 13 | 15 | 159 | 164 | 386 | 307 |
| Nova Scotia | 17 | 19 | 454 | 380 | 565 | 477 |
| Ontario | 89 | 88 | 940 | 796 | 3,759 | 1,887 |
| Prince Edward Island | 5 | 3 | 70 | 70 | 149 | 106 |
| Quebec | 65 | 61 | 1,019 | 903 | 2,592 | 1,272 |
| Saskatchewan | 1 | 1 | 68 | 3 | 64 | 14 |
| Unorganized Territories | 1 | 1 | 43 | — | 110 | — |
| Totals | 206 | 201 | 3,204 | 2,475 | 8,800 | 4,324 |

In fixing the remuneration of enumerators it was recognized that, as the scope of investigation was much wider than in 1891, a substantial increase should be made in the rates of allowance which the Minister of Agriculture is authorized to prepare under section 24 of the Census Act, and accordingly a scale was adopted which, in the judgment of the Minister, was sufficiently liberal to enable a diligent enumerator to earn the maximum of $3 per day which may be paid under the Act. The following table shows the scale of rates for 1901 and 1891 respectively in all the older Provinces of the Dominion :

| | 1901. | 1891. |
|---|---|---|
| For each living person | 5c. | 3c. |
| For each death | 5c. | 3c. |
| For each farm | 25c. | 15c. |
| For each factory | 30c. | 20c. |

Being an increase of 58⅓ per cent. But in the rural parts of those Provinces an additional allowance of $1.50 per day was made for horse hire with the object of enabling enumerators to go over the ground and finish the work with greater ease and in shorter time. The unusual snowfall and in many localities the almost impassable state of the roads seriously interfered with the progress of the work, but there is no doubt that the allowance for horse hire was an economic provision.

In the outlying parts of Ontario and Quebec, where the population is relatively sparse and areas extensive, the rate of $3 per day was adopted, with an allowance for travelling expenses. The same rate of remuneration was also fixed for Manitoba and the Northwest Territories, with actual expenses in the rural districts of not more than $5 per day. In British Columbia, where wages are higher than in any other part of

the country with organized Government, the maximum allowance to enumerators was made $8.50 per day. But wherever the per diem rate was authorized, the accounts were required to be supported by the sworn statements of the enumerators.

The addition of 275,330 to the population of Manitoba, the Northwest Territories and British Columbia, and the large extent of new ground canvassed by enumerators as shown by the increased number of sub-districts, are elements in the cost of the Census there. The two Provinces and three Territories present a total area of 744,742 square miles, and their population is less than one per square mile—being 796 per 1,000 square miles. In part the region is traversed by great mountain ranges, and in part it is a vast plain of prairie loam, and over plain and mountain the best road is often only a track or a trail. Good roads, and bridges to cross the many rivers and streams, will come as the country fills up with settlers, but in its present state the taking of a census is necessarily a difficult and costly enterprise.

The enumeration of the unorganized Territories of Keewatin, Athabaska, Mackenzie and Yukon was undertaken in this Census for the first time. For this service 110 enumerators were employed, with packers and canoemen to help in traversing the country, and wherever people were found—in mining camps, on fishing grounds, at trading posts or mission stations—a record of them by name was made in the usual way. But for greater convenience a special schedule with a limited number of inquiries was used for those Territories. The task was arduous and frequently perilous for the men who were engaged in it; but it is very gratifying to record that neither in those remote regions nor elsewhere in the wide Dominion has the taking of the Census been attended with the loss of one life.

The following extracts from the Book of Instructions to chief officers, commissioners and enumerators will make clear the general scheme of the Census, as well as that part of the work which relates to the contents of this volume.

## INSTRUCTIONS TO OFFICERS.

1. The Fourth Census of the Dominion is required to be taken this year under the provisions of the Census Act (Revised Statutes of Canada, 1886, c. 58) so as to ascertain with the utmost possible accuracy for the various territorial divisions of the country their population and the classing or grouping of it as regards age, sex, social condition, religion, education, race, occupation and otherwise, and whatever other matters are specified in the forms and instructions to be issued and used as provided in the Act.

2. The Act does not specify the plan of the Census concerning details of information, forms to be used, procedure to be followed, or the dates with reference to which the Census is to be taken; but it provides that they are to be such as the Governor in Council shall by Proclamation direct.

3. The details of information and forms to be used for the Fourth Census are as indicated in the eleven schedules contained in the Proclamation of the Governor in Council made 8th January inst., and published on the 15th in an Extra of *The Canada Gazette*, and according to instructions and forms to be issued by the Minister of Agriculture for the working thereof.

The Proclamation also directs and provides:

"1. That the population to be recorded shall be the population in existence on the 31st day of March, A. D. 1901, and that other information to be gathered shall also have reference to the same date, unless otherwise determined by Our Minister of Agriculture for Canada as regards information under schedules 8, 9, 10 and 11. That the procedure to be followed for obtaining the enumeration of the population shall be in accordance with the system known by the name of the *de jure* system.

"2. That the division of the country into census districts and sub-districts shall correspond respectively as nearly as may be with existing electoral divisions and sub-divisions, and that except as may be otherwise directed by Our Minister of Agriculture the units of enumeration for census purposes shall be the polling sub-division areas of the several electoral divisions adopted for the recent Parliamentary elections; but that in territories not so defined or situated as to admit of adhering to circumscriptions already established, special divisions and sub-divisions shall be formed for census purposes by authority of Our Minister of Agriculture.

"3. That the subdivisions of a census district shall ordinarily consist of townships, parishes, cities, towns and incorporated villages.

"4. That the census officers provided for in section 8 of The Census Act shall comprise four for each of the Provinces of Ontario and Quebec and one for each of the other Provinces and the Northwest Territories, whose duty shall be to instruct census commissioners in the method and work of the census.

"5. That there shall be a census commissioner for each census district, or two commissioners if the district is extensive or has a large municipal population or comprises more than one county municipality, and one enumerator for each polling sub-division or for a group of polling sub-divisions when Our Minister of Agriculture in special cases so directs; and the duties of such officers and the period of time within which their returns and reports must be completed and made shall be as provided in the Act and according to the regulations and instructions authorized by the Act, or as in special cases Our Minister of Agriculture may direct.

"6. That as to the registration of diseases or causes of death the Bertillon nomenclature is already in use in the Provinces of Ontario and Quebec and in the Republic of Mexico, and has been endorsed for adoption on January 1, A.D. 1901, for a period of ten years by the delegates of eighteen countries to the International Commission which met at Paris during the year 1900 to deal with the subject (including the delegate of the United States), and as uniformity of statistics is essential in making comparative studies of mortality, it is advisable to follow the Bertillon or International nomenclature in taking the census of Mortality (schedule 3); and that, to ensure as complete a record of diseases or causes of death as possible, it is further advisable to obtain the co-operation of provincial or other local offices of Vital Statistics where such offices have been organized, under arrangements and terms to be sanctioned by Our Minister of Agriculture.

"7. That at the discretion of Our Minister of Agriculture, and subject to such limitations of territory and of industries as he may determine, the census of Manufactures (schedule 8) and the census of products of the Forest (schedule 9) may be entrusted to one or more special agents in each Province; the census of Fisheries (schedule 10), subject to limitations of territory, to one or more special agents, or to the Department of Marine and Fisheries, or, in the case of any Province which has assumed administration of the fisheries under the decision of the Privy Council, to the provincial officer charged with such administration; and the census of Mines and Minerals (schedule 11), subject to such limitations of territory and of classes or kinds of mineral products as Our Minister of Agriculture shall determine, to the regular enumerators, to special agents, or to the Geological Survey, as may in each case be deemed most advantageous and expedient."

4. The date selected for recording the population is the same as the date fixed by the Imperial Parliament for taking the census of Great Britain, being Sunday the 31st day of March. The decisive hour of reckoning is made 12 o'clock or midnight on the night of 31st March to 1st April, so that every one born before that hour and every one dying after it are to be counted in the population.

5. In providing that the census of the people is to be taken by the *de jure* system, the proclamation does not give a meaning to that term. Neither does the Census Act, nor any other statute. It must be determined largely by usage, and therefore the practice of former censuses in Canada should be followed with reasonable closeness. In the case of a great majority of the people, their home or usual place of abode is the place where they should be counted; but particular directions are given in dealing with schedule No. 1.

6. Census districts are required to conform as nearly as may be with the districts for the representation of the people in the House of Commons at Ottawa, and census sub-districts to the cities, towns, incorporated villages, townships and parishes which constitute an electoral district. But in order that the census work may be speedily and well done, polling sub-division areas are to be the units of enumeration as a rule. Where they are of small extent, or where the inhabitants are few, two or more polling sub-divisions may be assigned to one enumerator.

7. The Census Act provides for three classes of officers for the outside service. The first class are chief officers representing the Provinces and Territories of the Dominion, who will receive instructions at the Census Office in Ottawa in the method and work of the census, and will in turn give instructions to the commissioners. The second class are the commissioners, who will have direction of the work in the several census districts for which they have been appointed. They are required to instruct enumerators in the details of recording the census as required in the schedules, to revise the work when it is done, and to transmit all papers to the Census Office, with which they will conduct all necessary correspondence. The third class are the enumerators, to whom will be entrusted the actual work of the census, and upon whose judgment, discretion and intelligence the completeness and accuracy of it will to a very large degree depend. The census must be taken and all the returns made to the office in Ottawa within a time to be fixed in the special instructions to each commissioner; and unless otherwise provided in the instructions, every enumerator shall begin his work on Monday the 1st day of April, and he shall continue it day by day (except Sundays) until the canvass of his area is completed.

8. In taking the census of Mortality, the causes of death will be entered according to the Bertillon or International nomenclature (or names of diseases), printed on the back of Specimen schedule No. 3. Experience proves that except under an organized system of daily or weekly registration it is extremely difficult to get full returns of mortality extending over a period of twelve months, and therefore it has been decided to supply commissioners with lists obtained from provincial or municipal registration offices where

these exist, for the use of enumerators. These lists are for the first nine months of the census year, beginning with April and ending with December, 1900.

9. In the enumeration of inmates of asylums, hospitals, penitentiaries and educational or other institutions, as well as of Treaty Indians, and in canvassing for statistics of manufactures, forest products, fisheries and minerals, it will generally be found advantageous to employ officials and other agents in place of the regular enumerators. In every such case the commissioner for the district will be notified, and he will be required to withdraw the schedules dealing with the particular subjects from the regular enumerators and to inform them accordingly.

10. The commissioners of census districts will be supplied from the Census Office at Ottawa with schedules, instructions and all other printed matter necessary for the taking of the census, to be distributed to enumerators when these are called together to receive directions for their work.

11. A set of papers sufficient for the requirements of each enumerator, according to the extent and population of the territory assigned to him, will be put in a portfolio furnished for the purpose of keeping them in a safe and cleanly state throughout the progress of his work. It may frequently happen in localities that some of the schedules are not required at all, or only in very limited quantity, and it will be the duty of the commissioner in consultation with each enumerator to ascertain the kinds of schedules and the number of sheets of each that may be wanted. In villages and towns, for instance, a fewer number of schedules 4, 5, 6 and 7 will be required than of schedules 1 and 2, while in rural parts a comparatively fewer number of schedule 8 (Manufactures) will be required than in villages and towns. In the case of schedule 3 (Mortality) an estimate of the number of sheets required may be made on the basis of 20 deaths in the year to each 1,000 of the population.

12. Care will be exercised by commissioners to so direct the enumerators that they will fully and clearly understand every detail of their duties,—(1) as regards the portion of country or unit of enumeration each one is to canvass, (2) as to the entries to be made in the several schedules, and (3) as to making returns to the commissioners of all schedules and papers when the canvass of the portion of country assigned to each enumerator is finished.

13. One of the special duties of commissioners is to ascertain and define by written description for the guidance of each enumerator the boundaries of the territory allotted to him, so that no part of the census district may be missed, or be taken by more than one enumerator.

14. The work of taking the census should begin at some well established starting point, whether it is in a township or parish, or in a city, town or village, and should be carried on continuously and regularly, whether it be one or more polling sub-divisions or a tract of larger extent.

15. In a township, parish or other country district, where the houses are scattered, it is advisable to start on a road or highway at the border line of the district and visit in succession every occupied house until the other side of the district is reached, when the next road may be taken in the same way, and so on until the whole area assigned to the enumerator is covered, taking care to finish the census of one farm or lot before proceeding to the next.

16. If an unincorporated village is included in the enumerator's district he should take the census of it separately from the rural portion proper, but on the same schedule. A short line drawn across the left hand margin above the number of the first family and another line below the number of the last family of the village as entered on the schedule, will be a sufficient mark of separation. But if the village have a distinct name it should be written along the left hand margin of the schedule, between the upper and lower lines. This separation will facilitate the tabulation of agricultural statistics, and it may have value as a record for historical use in tracing the origin and rise of future towns in the country. The census of unincorporated villages, however, will be included as heretofore with the statistics of rural sections.

17. In cities, towns and incorporated villages, where the land is usually laid out in blocks or squares bounded on four sides by streets, the enumerator should start at one corner of the block and proceed around and through it, entering every occupied house or building in regular order and collecting all the information called for in the schedules before proceeding to the next block or square, and should so continue until the whole of his census district is finished.

18. If the enumerator's district is partly in an incorporated town or village and partly in the country, he should take the two portions separately as described above in No. 16, and distinguish the portions so carefully that no mistake of mixing rural and urban statistics can be made in the tabulation work of the Census Office at Ottawa.

19. Where grain, fruit and root crops are grown, and domestic animals are kept, and ornamental or other trees are planted, in cities, towns and villages, the statistics of them (including values) should be

taken as carefully as the statistics of crops and animals on farms; as also the area of land occupied and the number of barns and other buildings in use by the head of each family or household, or by any member of it.

20. The head of every family or household (or whoever gives the information for it) should be asked particulars concerning all the schedules, unless any one of them has been withdrawn from the enumerator, in order that full and complete particulars may be gathered covering the whole scope of the census for every part of the country.

21. If the schedules have been withdrawn, it will still be the duty of the regular enumerator of a district to make inquiry and report the institution or industry and the name and address of its owner, manager, agent or officer in charge to the census commissioner of his electoral district, who will at once forward the particulars of the information to the Census Office at Ottawa for the use of the special agent who may be appointed to take the census of such institution or industry.

22. Every commissioner, enumerator or other person employed in the execution of the Census Act must take and subscribe an oath binding him to the faithful and exact discharge of his duties under the provisions of the Act, and in all respects as required by the forms and instructions issued by the Minister of Agriculture; and every such person who makes wilful default in any matter required of him by the Act or the instructions, or who wilfully makes a false declaration touching any such matter, is guilty of a misdemeanour.

23. Every officer or other person employed in any capacity on census work is required to keep inviolate the secrecy of the information gathered by the enumerators and entered on the schedules or forms. An enumerator is not permitted to show his schedules to any other person, nor to make or keep a copy of them, nor to answer any question respecting their contents, directly or indirectly; and the same obligation of secrecy is imposed upon commissioners and other officers or employees of the outside service, as well as upon every officer, clerk or other employee of the Census Office at Ottawa. The facts and statistics of the census may not be used except for statistical compilations, and positive assurance should be given on this point if a fear is entertained by any person that they may be used for taxation or any other object.

24. No result of the enumeration may be given to the public in advance of the printed bulletins or reports, except by the head officer of the census acting under the authority and direction of the Minister of Agriculture.

25. It is not permitted to a commissioner, enumerator or other employee of the census to engage a substitute or farm out his work to another. The position to which he is appointed must be filled by himself, and its duties must be performed by himself. Prompt and expeditious service is required from the time that the work is commenced until it is finished.

26. It is the duty of an enumerator on entering a house to act with civility, to state his business in a few words, to ask the necessary questions, to make the proper entries, and to leave the premises as soon as his business has been transacted. His conduct must be judicious, and it is only when persons refuse to answer questions or to give the required information that legal proceedings may be taken against them.

27. Unless otherwise specified in the detailed instructions, the census year shall be the year beginning April 1, 1900, and ending March 31, 1901, for all questions and subjects under schedules 1, 2, 3, 4, 5, 6 and 7, and the year beginning January 1 and ending December 31, 1900, for all questions and subjects under schedules 8, 9, 10 and 11.

28. Unless otherwise instructed for particular localities, enumerators are required to begin the canvass of their respective districts on Monday the first day of April, and to prosecute it continuously from day to day, except Sundays, until the work is completed.

29. The day's work of census officers, commissioners, enumerators and other employees for the taking of the census will consist of eight hours of proved effective service, and all overtime work will be allowed as part of a day at the same rate of remuneration as is provided for a day's work. Ten hours of proved effective service will count as one day and one-quarter, and twelve hours as one day and one-half.

30. The Census Act published with these instructions (pp. 32-37) should be referred to for other duties of census officers of the several classes, especially as provided in sections 11 and 12 of the Act; and also for the authority under which they may proceed to collect every particular of information called for in the schedules, as provided in 16, 17, 18, 19 and other sections of the Act.

### INSTRUCTIONS RELATING TO ALL SCHEDULES.

31. The commissioner will fill the blanks in the heading of each schedule with the name of the Province or Territory, the name of the electoral district, the number of the polling sub-division or other

unit of enumeration, and the name of the city, town, village, township or parish in which the polling sub-division or unit of enumeration is situated, according as the blanks in each schedule heading requires; and he will furnish each enumerator with a written or printed copy of the boundaries of the area assigned to him, whether a polling sub-division or an area of greater or less extent.

32. The enumerator will study with great care the written description of the boundaries of the territory assigned to him (as provided in Instructions 13 and 31), so that he may have a thorough knowledge of it. He should make himself acquainted not only with the precise boundaries of his territory, but with every portion of it which may be rural or urban, so that farm lands may be distinctly separated from towns, villages and hamlets or parts of such centres of population. He should be careful to set at rest any doubt that may arise as to boundaries between his own and adjoining enumeration territories in order to assure himself that no single house or portion of land is omitted from the enumeration and that none is included which belongs to the territory of another enumerator.

33. In some sparsely settled regions several townships or parishes may be grouped to form one polling sub-division or unit of enumeration assigned to one enumerator, and where this occurs the name of each township or parish should be entered in the blank line. But in every such case the name of each township or parish should also be written by the enumerator on the left hand margin of the sheet, as required in No. 16 of these Instructions, in order that the census of each may be kept separate and distinct.

34. Where two or more townships or parishes are united to form one municipality the same instruction should be followed, for the purpose of future reference and comparison when each one of such townships or parishes may become organized as a distinct municipality.

35. The number of each page will be entered consecutively on the sheets in the blanks left for it in the headings, and when a page is filled the enumerator will sign his name in the blank left for it in the heading. He should also enter after the word "Enumerator" the day or days on which the sheet was filled, thus: April 2, or April 3-5, or as the case may be.

36. The enumerator is required to make all entries on the schedules in ink of good quality, and every name, word, figure or mark should be clear and legible. If a schedule cannot be read, or if the entries are made with a poor quality of ink, or in pencil, or if they are blurred or blotted, the work of the enumerator may be wholly wasted. The census is intended to be a permanent record, and its schedules will be stored in the Archives of the Dominion.

37. Every sheet of the schedules and other special forms, whether filled or not and whether spoiled or not, must be returned by the enumerator to the commissioner, and by the commissioner to the Census Office at Ottawa.

38. Census commissioners and enumerators should read all Instructions in the light of the Specimen schedules 1, 2 and 3, which are supplied to illustrate clearly the sense in which every schedule of the series is required to be filled. If there is any doubt in the mind of the enumerator on any point, either before or after the work of the census has commenced, he should communicate at once with the commissioner of his census district; and if there is any uncertainty in the mind of the commissioner he should apply either to the Census officer who has instructed him, or to the chief officer of the Census at Ottawa.

### INSTRUCTIONS FOR SCHEDULE NO. 1.

40. Schedule No. 1 is framed with the object of enumerating the population of the country by name. Every person whose habitual home or place of abode is in an enumerator's district in any part of the Dominion is to be entered on the schedule by name, irrespective of age, sex or condition—the head of the family or household to be taken first and the other members in regular order.

41. In columns 1 and 2 the dwelling house and the family or household will be numbered in the order of visitation, and as in the same house there may be one or more families or households the numbering under the two heads of the schedule will not necessarily correspond. As defined in the Census Act, the term "house" includes ships, vessels, dwellings or places of abode of any kind. Any structure which provides shelter for a human being is a house, and if it has only one entrance it counts only as one dwelling house, no matter how many families it may shelter; but if there are two front or principal doors leading into separate parts, the structure will be counted as two houses.

42. The population is grouped for census purposes under the heads of families, households and institutions. In the restricted sense of the term, a family consists of parents and sons and daughters united in a living and housekeeping community: but in the larger sense it may include other relatives and servants. A household may include all persons in a housekeeping community, whether related by ties of blood or not, but usually with one of their number occupying the position of head. But single persons living alone.

who have a special dwelling and carry on their own housekeeping, are also to be regarded as households. Other persons living alone, or persons who rent rooms and only sleep in the house, will be included in the list of those households which carry on housekeeping for them, although they may take meals elsewhere. An institutional household includes such establishments as hospitals, asylums, poor houses, prisons, penitentiaries, schools of learning, barracks, etc., whose inmates, if they have no home or domicile elsewhere outside of the institution, are to be entered under the name of the institution. The attendants, cooks, etc., of an institution are not to be counted with the guests or inmates, but with the household of the head of the institution, or with their own or other household of which they form a part.

45. The heads of families, households and institutions are required to furnish the enumerator with all particulars regarding every person in the family, household or institution, as called for in the schedules.

46. In making the entries of the names of all persons in a family or household in column 3, there will be no doubt as regards a very large majority of the population. Their homes are fixed and known. But in every case where members of a family or household are temporarily absent from their home or usual place of abode, their names and records should be dealt with so as to conform as nearly as may be with the general conception of a de jure system of enumeration. The christian name and surname of each person should be entered in this column in full, but if the person have a middle name it will only be necessary to write the initial of it.

47. The races of men will be designated by the use of "w" for white, "r" for red, "b" for black and "y" for yellow. The whites are, of course, the Caucasian race, the reds are the American Indian, the blacks are the African or negro, and the yellows are the Mongolian (Japanese and Chinese). But only pure whites will be classed as whites; the children begotten of marriages between whites and any one of the other races will be classed as red, black or yellow, as the case may be, irrespective of the degree of colour.

48. In column 6 the head of each family or household will be entered as such, and all others according to the relationship—as wife, son, daughter, servant, boarder, lodger, partner, etc. The persons in an institution may be described as officer, inmate, patient, prisoner, pupil, etc.

49. Under column 7 the description will be given by the use of the initial letter of "s" for single, "m" for married, "w" for widowed and "d" for divorced. Persons separated as to bed and board will be described as married.

51. In describing the country or place of birth it will suffice in the case of all persons born out of Canada to give the name of the country, as England, France, Germany or the United States, without giving the names of smaller sub-divisions. If born in Canada, the name of the Province or Territory should be given, as it will serve to indicate the tendency towards migration. In all cases, too, it is important to know whether the person is country born or town born, which will be denoted by the addition of the letter "r" for rural or the letter "u" for urban, as the case may be. Thus, a person born in a town in Nova Scotia will be described in column 11 as "N.S. u," or if born on a farm in Quebec as "Q. r."

52. If the person is foreign born the year of immigration to Canada will be entered in column 12; and if born in some other country than the United Kingdom or any of its colonies or dependencies, the year in which the person has been naturalized and has acquired rights of citizenship should be entered in column 13. If the person has applied for papers, but has not yet reached the full status of citizenship, the fact should be indicated by writing in the column the letters "pa."

53. Among whites the racial or tribal origin is traced through the father, as in English, Scotch, Irish, Welsh, French, German, Italian, Scandinavian, etc. Care must be taken, however, not to apply the terms "American" or "Canadian" in a racial sense, as there are no races of men so called. "Japanese," "Chinese" and "negro" are proper racial terms; but in the case of Indians the names of their tribes should be given, as "Chippewa," "Cree," etc. Persons of mixed white and red blood—commonly known as "breeds"—will be described by addition of the initial letters "f.b." for French breed, "e.b." for English breed, "s.b." for Scotch breed and "i.b." for Irish breed. For example: "Cree f.b." denotes that the person is racially a mixture of Cree and French; and "Chippewa s.b." denotes that the person is Chippewa and Scotch. Other mixtures of Indians besides the four above specified are rare, and may be described by the letters "o.b." for other breed. If several races are combined with the red, such as English and Scotch, Irish and French, or any others, they should also be described by the initials "o.b." A person whose father is English, but whose mother is Scotch, Irish, French, or any other race, will be ranked as English, and so with any others—the line of descent being traced through the father in the white races.

54. Nationality is a term of more or less conventional meaning. But as it applies by right of established usage to the citizens of Canada—the expression 'new nationality' was in this sense introduced

in the speech with which the Governor General opened the first Canadian Parliament—it is proper to use Canadian in column 15 as descriptive of every person whose home is in the country and who has acquired rights of citizenship in it. A person who was born in the United States, or France, or Germany or other foreign country, but whose home is in Canada and who is a naturalized citizen, should be entered as a Canadian; so also should a person born in the United Kingdom or any of its colonies, whose residence in Canada is not merely temporary. An alien person will be classified by nationality according to the country of his birth, or the country to which he professes to owe allegiance.

55. The religion of each person will be entered according as he or she professes, specifying the church or denomination to which the person belongs or adheres, or which he or she favours. If the sons or daughters belong, or adhere to, or favour another church or denomination than that of their parents, or of either of them, the proper entry should be made; but except in such cases they should be classed with their parents. The classification of the people by their religious faith must not ignore any church, or denomination, or form of belief, saving in the case of a church or denomination whose identity has been lost by union or otherwise. There is no State Church in Canada, and if a person is not a member of or does not adhere to or favour any one church or denomination he must not be classed with one or another. If he is an agnostic, or a non-believer, or a pagan, or a reincarnationist, or whatever his relationship to religion may be, he should be so classed.

56. In columns 17 to 21 inclusive the enumerator will enter the profession, occupation, trade or means of living of each person, and indicate the positions they occupy as persons living on their own means, as employers, as employees, or as working on their own account.

57. The chief or principal calling is the only one to be recorded; that is to say, the one on which the condition of life chiefly rests and from which the gains, earnings or income are chiefly obtained.

58. Expressions such as "manufacturer," "merchant" and "labourer" are inadequate; the particular branch of industry, or trade, or profession or other calling in which the person enumerated is engaged should be given. Workingmen and day labourers should always state the kind of work or business branch in which they are usually employed, as farm labourer. If the person is a labourer in a mill, factory or workshop, specify the works in addition to the term labourer, thus, "labourer (brick works)." If he is a skilled workman, specify besides the general name of the industry in which he is employed, the particular branch of it in which he is engaged and the material in which he works, as "brass-founder," "cotton spinner," "gold-miner.' If the person has retired from his gainful calling or occupation, it will be indicated by adding the letter "r" to the description.

59. For persons who do not carry on any remunerative calling and live on their own means, as from incomes, superannuations, annuities, pensions, &c.; for persons who are employers, as mill-owners, large farmers, &c., whose work is done by others for which salaries or wages are paid; for employees who work for salaries or wages; and for persons employed in gainful occupation, doing their own work, the proper entries will be made in columns 18, 19, 20 and 21 respectively. An affirmative answer will be indicated by the down stroke ( | ) and the negative answer by the dash (—) in the proper column.

60. If married women, other female dependents or children carry on a gainful or wage-earning occupation in any capacity, the kind of occupation will be given, and they will be classed as employers or employees as the case may be; but if they are only carrying on domestic affairs in a household without wages they are not to be classed as having any occupation. A person doing piece-work at home will be entered according to the occupation, whether employed under contract or agreement with a manufacturer or other employer of labour, or as a helper to the person so employed.

61. The rank in principal calling or occupation is to be clearly given, so that it can be exactly recognized whether the enumerated person is (1) an independent business manager; or (2) belongs to the business office (as manager, inspector, confidential clerk, book-keeper, clerk of works, cashier, treasurer, foreman or other working official; or (3) stands in some working relation (such as journeyman, assistant, apprentice, factory operative, workman, waiter, shopman, salesman, day labourer, navvy, coachman, drayman, stableman, handyman, cook, maid, housemaid, female servant, farm labourer, farmer's son, &c. —the position or office of the enumerated person being always given in connection with the business, occupation or profession.

62. Entries under the heading of Wage Earners will be made under columns 22 to 27 inclusive, for each person named in column 3 who is employed in any industrial or other occupation and is paid salary, wages or other money allowance for his or her service, and whether employed by piece-work or by time (hour, day, week, &c.), at home, in a factory, or elsewhere.

63. Columns 22, 23 and 24 refer particularly to employees in factory work, and the additional letters "f" and "h" will be used to denote whether the place of employment is the actory or the home, or both.

The letter symbol "(f) f" denotes that the person is working at his trade in the factory; "(f) h" will denote that he is working at home; and "(f) f h" will denote that during the census year he has been working part of the time in the factory and part of it at home. The entries in columns 23 and 24 will show how much of the year, as expressed in months, he has been employed at his trade in the factory and at home respectively.

64. In column 27 will be entered the number of months that the person has been employed otherwise than at his regular trade in the factory or at home; or, if not a tradesman, at whatever his occupation may be. (s) is a wage earning one. For census purposes the terms salary and wages have a common meaning, being the amount or sum of money which one person employed by another receives for his service, whether the work done be professional, literary or handicraft.

65. Columns 28 to 33 relate to the education and language of each person named in the schedule, of the age of five years and over. Column 28 refers of course to persons of school age, being those over five and under twenty-one years. If the person has attended school during the census year the time will be indicated by the number of months, and if he or she has not attended school during the year it will be indicated by a horizontal dash (—).

66. Columns 29, 30, 31 and 32 will be answered by the figure 1 for "Yes" and by a dash (—) for "No," as the fact may be; and account is not to be taken of the degree of proficiency as regards any one of the questions. English and French were made official languages by section 133 of the British North America Act 1867, and therefore special provision is made in the schedule for a record of all persons five years of age and over who speak one or other of these languages. But the same person may speak both languages, and in every such case the answer (1) "Yes" should be entered in both columns.

67. Mother tongue is one's native language, the language of his race; but not necessarily the language in which he thinks, or which he speaks most fluently, or uses chiefly in conversation. Whatever it may be, whether English, French, Gaelic, Irish, German, Swedish, Russian or any other, it should be entered by name in column 33 if the person speaks the language, but not otherwise.

68. Infirmities are recorded under the heads of the three classes, (a) Deaf and Dumb, (b) Blind, and (c) Unsound Mind. It is not necessary that the degree of infirmity should be absolute or total, but that it should be so sufficiently marked in any one of the classes as to have reached the stage of incapacity. If the infirmity is congenital (that is to say, if it is born with one), or if it dates from childhood, the words "from childhood" should be added, thus: Blind, from childhood. The infirmity, where it exists in a person, will be entered by name in column 34: and where it does not exist the entry in the column will be the dash (—), or usual sign for a negative.

69. The literal meaning of the term *de jure* is "by right of law," "rightfully," or "legally"; but the term has no strict legal meaning. Neither in the statutes nor in the decisions of the courts has an exact or fixed definition been given to it. When, therefore, it has been ordered that the enumeration of the people shall be in accordance with the *de jure* system, there is room for misunderstanding and error, in spite of instructions on the usage meaning of the term.

70. There is a probability that some persons may be counted in two places, and that others may not be counted at all. A domestic servant, for example, may be reported at the home of her parents as a member of the family *de jure*, and she may also be reported as *de jure* of the household where she is employed. Or if absent from home for a comparatively long time and in her present place of service for only a short time, she may be left out of the enumeration altogether. The same thing may occur in the case of clerks, salesmen, artisans, labourers, railway employees, etc.

71. It is not possible to lay down a rule applicable to every case; but, generally, where there is a doubt, reference to the names of persons who are temporarily absent by number of page and line in schedule No 1 should be entered in the Special Form A at the same time that the enumeration is being made according to schedule No. 1, and with the help of information supplied in this way a large percentage of possible defects and errors may be eliminated at the Census Office.

72. The enumerator will enter in Special Form A the reference by number of page and line in schedule No. 1 to the name of every member of a family or household who is reported to be absent from the home or domicile, and whose absence is considered by the head of the family or household (or whoever gives the information) as temporary.

73. A student at college, a sailor or fisherman at sea, a lumberman in the forest, a merchant or trader in foreign parts, a commercial traveller on the road, inmates of hospitals, penal institutions, etc., and other like persons whose period of absence is more or less definite and known, should be so entered.

74. But in the case of persons who have gone away from the home or domicile to which they belonged to pursue some trade or calling, or to begin life on their own account in any part of Canada or in another

country, no record should be made by the enumerator either in schedule No. 1 or in the Special Form unless there is a fixed period of return.

75. If the head of the family or household (or whoever gives the information) is in doubt concerning the intention of such persons to return, and if they be absent twelve months, they are not to be taken in the census by the enumerator, the presumption being that they have settled elsewhere.

76. Persons in a family or household whose home or domicile has been elsewhere should not be taken by the enumerator unless it be ascertained that they do not intend to return, when they should be entered on schedule No. 1 whether the time of their residence in the locality be long or short.

77. In the case of every entry in the Special Form A, enter in columns 1 and 2 the number of page and line of schedule No. 1 on which the name occurs of a person ascertained to be temporarily absent. The number of months of absence from home is to be recorded in column 3. In column 4 is to be recorded the answer to the question: "Does person intend to return home?" Under column 5, describing "Locality where person is to be found" give (if in Canada) name of Province or Territory and of city, town or village, with street and house number; or of township, parish or other municipality, with concession and lot or cadastral number; and also post office address. If out of Canada, give name of country only, or of State if in the United States.

78. Inquire of the head of every family or household (or whoever gives the information) if any person of the family or household is temporarily absent, so that the proper record concerning such person may be made in the Special Form A.

79. No. 43 of these Instructions requires the heads of families, households and institutions to furnish the enumerator with all particulars regarding every person in the family, household or institution, as called for in the schedules. It may happen, however, in the case of boarders, lodgers and others that the head of the family, household or institution is unable, owing to their temporary absence, to give the details of information regarding such persons at the time when the enumerator calls, and to provide for such cases Special Form B has been prepared. It is an individual form, similar in every particular to schedule No. 1, and one copy of it will be left by the enumerator with the head of the family, household or institution for each such person, to be filled up by a date and hour marked thereon by the enumerator, and to be collected by him and entered in its proper place in schedule No. 1.

80. Section 17 of the Census Act provides that every person who wilfully or without lawful excuse refuses to fill up to the best of his knowledge and belief any schedule required of him by the enumerator, or other person employed in the execution of the Act, "or refuses or neglects to sign and deliver up or otherwise return the same when and as required, or makes, signs, delivers or returns, or causes to be made, signed, delivered or returned, any wilfully false answer or statement as to any matter specified in such schedule, shall incur a penalty not exceeding forty dollars and not less than one dollar."

This volume of the Census deals wholly with Population, and the tables are grouped under the five following classes, namely:

1. Comparative tables of Population.
2. Areas, Houses, Families, Population, Sex and Conjugal Condition.
3. Religions of the People.
4. Origins and Nationalities.
5. Birthplace and Immigration.

The first group comprises tables showing—

I. Population of 1871, 1881, 1891 and 1901, compared by Electoral Districts within their present limits (1901), pp. 2–5.

II. Houses, families and population in 1891-1901, compared by Census Districts within their present limits (1901), pp. 6–9.

III. Sex and conjugal condition in 1891-1901, compared by Census Districts within their present limits (1901), pp. 10–17.

IV. Rural and urban population in 1891-1901, compared by Census Districts within their present limits (1901), pp. 18–21.

V. Population of cities and towns having over 5,000 inhabitants in 1901, compared with 1871, 1881, 1891, p. 22.

In addition to the comparative statement of population, Table I gives the representation of each district in Parliament at the present time, together with a summary by Provinces of representation in the period 1871-1901. In Table III no comparison is shown under the head of divorced, as the Census of persons of this class was taken in 1901 for the first time. The urban population in Table IV embraces all persons whose residence is in the incorporated villages, towns and cities of the country. In Table V the whole population of incorporated towns and cities having over 5,000 inhabitants is given regardless of their position as parts of two or more Electoral districts.

The second group comprises tables showing—

VI. Areas of lakes in Canada by Provinces and Territories, pp. 24–25.

VII. Areas, houses, families, population, sex and conjugal condition in 1901, by Districts and Subdistricts, pp. 26–142.

The areas in both tables have been computed for the Census Office by Mr. James White, geographer of the Department of the Interior, from the latest official maps, surveys and records; but in Nova Scotia and unorganized parts of Ontario and Quebec, where the subdistricts constitute polling districts for election purposes, data were not available for computing areas by subdistricts. Table VII gives land areas only, and in making up aggregates for Provinces and the Dominion the lake areas of Table VI must be added. All tidal waters, as Hudson Bay, Ungava Bay, the Gulf of St. Lawrence and the Bay of Fundy, are excluded, but it has been usual to include all that part of the River St. Lawrence above the meridian of Point de Monts in Saguenay with the area of the Dominion, although the tide ascends as far as Lake St. Peter. With the addition of 2,967,556 acres to the water area of Quebec, and of 124,362 acres to the water area of Ontario for the parts of the St. Lawrence, Niagara, Detroit and St. Clair Rivers,[1] the land and water areas of the several Provinces and Territories of the Dominion are as shown in the following table:

| Provinces and Territories. | Land, acres. | Lakes, acres. | Total acres. | Total sq. miles. |
|---|---|---|---|---|
| British Columbia | 236,922,177 | 1,560,830 | 238,483,007 | 372,630 |
| Manitoba | 41,169,098 | 6,019,200 | 47,188,298 | 73,732 |
| New Brunswick | 17,863,266 | 47,232 | 17,910,498 | 27,985 |
| Nova Scotia | 13,483,671 | 230,100 | 13,713,771 | 21,428 |
| Ontario | 141,125,330 | 25,826,306 | 166,951,636 | 260,862 |
| Prince Edward Island | 1,397,991 | ... | 1,397,991 | 2,184 |
| Quebec | 218,723,687 | 6,474,874 | 225,198,561 | 351,873 |
| Alberta | 64,973,212 | 232,000 | 65,205,212 | 101,883 |
| Assiniboia | 56,498,546 | 384,000 | 56,882,546 | 88,879 |
| Saskatchewan | 66,460,859 | 2,414,500 | 68,875,359 | 107,618 |
| Athabaska | 155,622,704 | 5,635,120 | 161,257,824 | 251,965 |
| Mackenzie | 340,886,420 | 18,910,080 | 359,796,500 | 562,182 |
| Keewatin | 292,478,010 | 8,588,260 | 301,066,270 | 470,416 |
| Franklin | 320,000,000 | ... | 320,000,000 | 500,000 |
| Ungava | 223,429,600 | 3,745,440 | 227,175,040 | 354,961 |
| Yukon | 125,649,500 | 415,280 | 126,064,780 | 196,976 |
| Total | 2,316,684,071 | 80,483,222 | 2,397,167,293 | 3,745,574 |

[1] This area of 124,362 acres comprises 103,114 acres of the St. Lawrence, 4,288 acres of the Niagara, 10,400 acres of the Detroit, and 6,560 acres of the St. Clair River.

Hudson Bay, lying between the Territories of Ungava and Keewatin, has an area of 284,000,000 acres, or 443,750 square miles; and the Gulf of St. Lawrence, lying between the Provinces of Nova Scotia and Quebec, has an area of 65,000,000 acres, or 101,562 squares miles. But these waters are not included in the area of Canada.

The third group comprises tables showing—

VIII. Religions of the people by Provinces, pp. 144–145.
IX. Principal religions by Census Districts, pp. 146–153.
X. Religions of the people by Sub-districts, pp. 154–282.

The first of these tables gives the population of 1901 classed into 45 specified religions; the second is a comparative table of nine principal religions in 1891 and 1901; and the third gives the population of 1901 by sub-districts classed into 20 specified religions.

The fourth group comprises tables showing—

XI. Origins of the people by Sub-districts, pp. 284–405.
XII. Nationalities by Census Districts, pp. 406–413.

In the Census usage of the terms (see 53 and 54 of the Instructions) origin refers to the race or tribe to which a person belongs or from which he is descended, and nationality to the country to which he professes to owe allegiance. Every person whose home is in Canada, and who holds or has acquired rights of citizenship in it by birth or naturalization, is described by nationality as a Canadian, regardless of his racial origin or his birthplace.

The fifth group comprises tables showing—

XIII. Birthplace of the people by Provinces, pp. 416–417.
XIV. Birthplace of the people by Districts, pp. 418–447.
XV Birthplace and citizenship of immigrants by Provinces, pp. 448–449.
XVI. Immigrant population by Provinces, pp. 450–451.
XVII. Immigrant population by Districts, pp. 452–481.
XVIII. Population by birthplace, 1881, 1891, 1901, p. 482.

Table XV shows the extent to which immigrants of alien birth have become naturalized, and Table XVIII shows the whole population of the country by birthplace in each of the Census years 1881, 1891 and 1901.

In the orthography of geographic names in this volume the rulings of the Geographic Board of Canada have been followed, as directed by the Order in Council of December 18, 1897.

ARCHIBALD BLUE,
*Special Census Commissioner.*

# QUATRIÈME RECENSEMENT DU CANADA 1901

## INTRODUCTION

On a fait le recensement de 1891 avec neuf tableaux contenant 216 questions, et le recensement de 1901 avec onze tableaux contenant 561 questions, comme il est constaté par l'état comparatif suivant :

| N° | 1891. | Q. | N° | 1901. | Q. |
|---|---|---|---|---|---|
| I | Les vivants | 25 | I | Les vivants | 34 |
| II | Les décès et institutions publiques | 13 | II | Bâtiments et terres, églises et écoles | 35 |
| III | Biens fonciers, produits du verger, pépinières, vignobles et jardins | 23 | III | Les décès | 15 |
| IV | Produits de la ferme | 30 | IV | Terres à culture, fruits et plantations | 37 |
| V | Animaux vivants, produits des animaux, étoffes de ménage, fourrures et travail de la ferme | 27 | V | Produits des champs | 37 |
| | | | VI | Bétail et produit des animaux | 26 |
| VI | Etablissements industriels | 23 | VII | Valeurs agricoles | 25 |
| VII | Produits de la forêt | 22 | VIII | Les manufactures | 67 |
| VIII | Marine et mines | 23 | IX | Produits de la forêt et fourrures | 51 |
| IX | Pêcheries | 30 | X | Les pêcheries | 130 |
| | | | XI | L'industrie minière | 104 |
| | Total | 216 | | Total | 561 |

En sus des tableaux indiqués plus haut, on a employé au recensement de 1901 quatre formules spéciales pour obtenir le dénombrement : (*a*) des personnes temporairement absentes, (*b*) des pensionnaires, locataires et autres, absents lors de la visite de l'énumérateur et au sujet desquels le chef de la famille ou du ménage ou de l'institution était dans l'impossibilité de fournir les renseignements voulus, (*c*) de l'état des produits des beurreries et fromageries, (*d*) de l'état des matériaux de construction en argile.

Le tableau des vivants, en 1891, était dressé de manière à connaître le lieu de naissance du père et de la mère de chaque personne énumérée, avec l'origine dans le cas d'un Canadien-français ; dans le cas d'un patron le nombre de ses employés durant l'année ; et dans le cas d'un employé, on demandait s'il s'était trouvé sans ouvrage durant la semaine précédant le recensement.

On ne trouve pas ces questions, en 1901, sur le tableau correspondant ; mais on y voit des questions qui ont pour but de désigner le pays ou lieu de naissance de chaque personne, l'année de son immigration au Canada si elle est née à l'étranger, l'année de sa naturalisation si elle n'est pas sujet britannique de naissance, sa nationalité et son origine selon la race ou la tribu. Le tableau est aussi dressé de manière à connaître le temps employé par chaque personne à son métier, occupation ou profession, et le montant de ses gages durant l'année.

Sous l'entête "Education et langue", on a demandé, en 1891, si la personne énumérée savait lire et écrire ; en 1901, on a voulu de plus savoir la durée de l'assistance aux écoles et la langue parlée par chaque personne. Le français et l'anglais ayant été institués langues officielles de ce pays, on a pourvu spécialement dans le tableau à une inscription indiquant que la personne énumérée parle l'une ou l'autre de ces deux langues, et aussi sa langue maternelle (si celle-ci est parlée). Dans un pays comme le Canada, peuplé de tant d'éléments différents, il est bon de constater si l'acquisition de l'une ou l'autre des deux langues officielles produit l'absorption et l'unification de ces divers éléments. Et, comme l'anglais est aujourd'hui dans une large mesure la langue du commerce dans le monde entier, il est également désirable de connaître le nombre de citoyens d'origine française qui peuvent le parler tout en s'exprimant aussi dans leur langue maternelle.

La question relative à la durée de l'assistance aux classes s'applique aux enfants d'âge à fréquenter les écoles seulement, et des détails supplémentaires relatifs au nombre de professeurs, d'élèves et d'appartements dans les écoles publiques, sont demandés au tableau n° II de ce recensement. D'autres questions dans ce tableau concernent les écoles du dimanche et les lieux de culte, et ont pour objet d'obtenir la statistique de ces institutions par confessions religieuses.

Mais le tableau n° II de ce recensement a pour principal objet d'obtenir un état des bâtiments et terres ; il commence par la description du lieu d'habitation de chaque personne énumérée, de façon à ce qu'on puisse l'indiquer sur une carte ou sur un plan du district ou le désigner exactement en visitant le terrain. De cette manière, il est toujours facile, après recherches, de découvrir si l'énumérateur a omis ou oublié une maison, ou s'il a entré la même plus d'une fois, ou si même il a enregistré une maison qui n'existe pas ; et pour chaque habitation il y a un renvoi direct au chef de la famille ou du ménage inscrit au premier tableau. Cette disposition n'existait pas en 1891, de sorte que, si des entrées illégales ont été faites, il est extrêmement difficile de les découvrir, surtout dans les grandes villes et cités où la population est plus instable que celle des districts ruraux, et où, souvent, une personne ne connait même pas de nom la moitié de ses voisins ou de ceux qui habitent le même pâté de maisons. Les tableaux des deux recensements contiennent des dispositions à peu près analogues pour le dénombrement des maisons, institutions, magasins, entrepôts, fabriques, etc., ainsi que pour les biens fonciers possédés ou loués, mais ils sont plus précis en 1901 qu'en 1891.

Il en est de même pour le tableau de la mortalité qui contenait dix questions en 1891 contre 15 en 1901.

Les tableaux de l'agriculture contenaient 75 questions en 1891 contre 127 en 1901 Parmi ces dernières, 4 sont pour les bâtiments de la ferme, 12 pour la classification de la superficie des diverses terres à culture, 22 pour les arbres de verger, les vignes et

les fruits, 37 pour les produits des champs, 26 pour le bétail et les produits des animaux et 23 pour la valeur des terres à culture, des bâtiments, des produits des champs, des vergers et du travail de la ferme. Et, comme tout recensement agricole n'est pas satisfaisant s'il ne tient compte de l'étendue de terre consacrée à chaque espèce de culture, les tableaux sont dressés de manière à indiquer autant que possible les produits de la terre, avec la superficie en acres sur laquelle chacun d'eux a été récolté.

Cependant, comme les arbres de verger et les vignes ont besoin de plusieurs années de croissance avant de pouvoir porter des fruits, il ne serait pas exact d'indiquer la superficie seulement ; en conséquence, la question s'étend au nombre d'arbres et de vignes portant des fruits comme à ceux qui n'en ont pas encore porté.

Pour la première fois, dans un recensement au Canada, des mesures ont été prises pour obtenir les chiffres des valeurs agricoles ; on peut être assuré que les données fournies seront la confirmation éclatante de la grandeur de notre agriculture et de la place très importante qu'elle occupe dans le développement de la richesse nationale.

On n'a pas cherché, cette fois, à obtenir de données sur la production du beurre et du fromage fabriqués à la maison, vu que l'établissement des beurreries et fromageries a presque complètement détruit ces industries domestiques.

Le tableau des manufactures a été dressé de manière à rencontrer les conditions présentes, ainsi qu'à obtenir la quantité et la valeur des produits industriels. C'est dire qu'il contient plus de détails que celui employé il y a dix ans et le nombre de questions a été triplé.

C'est une anomalie de considérer comme un établissement industriel toute chambre ou boutique dans laquelle une ou deux personnes sont employées, et on ne peut accepter cette définition quand tout, dans l'industrie, tend vers la concentration du capital, de l'administration, de l'habileté et du travail. Il y a sans doute des raisons pour désirer connaître la variété et la valeur du travail individuel ; mais dans tout plan bien conçu ayant pour objet d'obtenir la statistique des manufactures, l'idée de fabrique doit représenter une entreprise moderne qui progresse. L'idée de manufacture doit avoir ses limites comme l'idée de ferme a les siennes ; ainsi nul ne songerait à considérer comme une ferme une pièce de jardin. En conséquence, après avoir examiné la question soigneusement, il a été décidé de donner au terme "manufacture" l'interprétation qui lui est donnée dans les statuts des provinces qui ont établi un système d'inspection des fabriques par des fonctionnaires de l'Etat.

Les questions de ce tableau qui concernent le capital actif des établissements industriels, la durée de leurs opérations pendant l'année du recensement, le nombre et les salaires de leurs officiers, gérants et employés, le nombre collectif des jours de travail durant l'année, le coût du loyer, du combustible, de l'éclairage, de la force motrice et des taxes, la quantité et l'espèce de matière employée à l'état brut, la quantité et les espèces d'effets manufacturés, le genre et la capacité de la force motrice possédée, ont pour but d'indiquer non seulement la valeur et le nombre des manufactures du pays, mais aussi de fournir des données précises aux législateurs et aux économistes. En d'autres termes, le but est de connaître la véritable position des industries du pays et les conditions dans lesquelles elles se maintiennent.

La fabrication du beurre et du fromage a des intérêts distincts de ceux des autres industries et les données qui la concernent ont été obtenues au moyen d'un tableau spécial.

Le tableau employé dans ce recensement pour les produits de la forêt a pour but d'indiquer les quantités et les valeurs des matériaux employés à l'état brut et préparés à la hache et à la scie dans la forêt. La production du bois de charpente, du bardeau, etc., tombe dans la catégorie des objets manufacturés.

Les questions ont été préparées de façon à concorder complètement avec les produits forestiers du pays tels qu'on les trouve énumérés dans les Tableaux des Exportations ; et à ce sujet, il est à remarquer que la disparition du pin, du chêne, du noyer et des autres bois de construction de valeur, dans les plus anciennes parties du pays, a créé une demande considérable pour nombre d'autres essences forestières employées aux fins les plus variées. L'industrie de la pâte (pulpe) à papier peut être considérée comme le principal exemple du nouvel état de choses ; mais il y en a plusieurs autres, et il est probable que des bois de nos forêts auxquels nous n'attachions autrefois aucune valeur et que nous regardions tout au plus comme bois à brûler pour leurs cendres, pourront devenir, pour les propriétaires du sol, des sources plus abondantes de revenus que toutes les richesses passées et présentes de nos pins, nos chênes et nos noyers.

Il y a dix ans, il suffisait de 22 questions pour recueillir tous les renseignements relatifs à l'industrie forestière ; aujourd'hui, le nombre des questions est de 50.

Le tableau relatif aux pêcheries contient 100 questions de plus qu'en 1891, et est en grande partie fondé sur le tableau statistique que fournit le ministère de la Marine et des Pêcheries, avec les additions et modifications nécessitées par le plan général du recensement.

A ce tableau sont portés le nombre, le tonnage et la valeur des bateaux et navires de pêche ; les espèces, le nombre et la valeur des appareils de pêche ; le nombre et la valeur des établissements de salaisons et de conserves ; les personnes employées dans l'industrie de la pêche et leurs gages ; le rendement et la valeur en détail des produits de cette industrie pour l'année du recensement.

A l'aide d'un bulletin tabulaire avec lequel les pêcheurs sont familiers dans ses principaux éléments, et grâce à l'emploi, pour le recueillement de la statistique, d'agents qui sont au fait de l'industrie et qui ont la confiance des pêcheurs, on a pu rassembler des détails très complets sous une forme propre à faciliter la tabulation. Dans l'Ontario, où l'administration des pêcheries est principalement sous le contrôle provincial, on a obtenu les services des fonctionnaires provinciaux ; dans la province de Québec on a aussi employé, lorsqu'on l'a pu, les officiers chargés des intérêts de la pêche dans la province. Mais pour les grandes pêches des côtes de l'Atlantique et du Pacifique, ainsi que dans les Territoires, un bon nombre des agents que nous avons employés sont des officiers du service de la Marine et des Pêcheries.

Dans le recensement précédent, on n'a pas fait usage de la statistique recueillie à l'aide du tableau X, dont l'objet n'était guère que de recueillir des renseignements sur l'outillage employé et le capital engagé dans les pêches, ainsi que sur les gages des pêcheurs.

Le bulletin tabulaire relatif aux usines et aux produits minéraux a été préparé de façon à obtenir pour chaque mine ou carrière l'étendue et la valeur du terrain minier, de même que le terrain ne contenant pas de minéraux, occupé pour les opérations minières ; le nombre, l'espèce et la capacité des usines, chantiers et appareils de traitement des minerais et minéraux et la valeur des bâtiments et de l'outillage ; le nombre des officiers

des mineurs et autres employés, et les appointements et gages payés aux différentes classes dans le cours de l'année ; la quantité et la valeur du minerai ou des minéraux tirés ; la quantité traitée aux mines ou aux usines ou chantiers ; la quantité et la valeur des produits de minerais ou de minéraux traités. Ces questions se rapportent respectivement aux mines métallifères et non-métallifères et aux usines ou chantiers y attachés. On a désiré obtenir les quantités et les valeurs sur les lieux de tous les produits minéraux ; mais dans le cas des minerais et des minéraux dont le traitement est un procédé de fabrication, comme celui du fer en gueuse, des pétroles, des ciments, du plâtre et du sel, les détails ont été recueillis au moyen du bulletin tabulaire relatif aux manufactures, et, dans le cas de la brique, de la poterie et autres produits de l'argile, au moyen d'un tableau spécial moins chargé et plus simple.

Il y a 3 questions dans le Tableau relatif aux personnes temporairement absentes, 29 dans celui qui a rapport aux fabriques de produits de l'argile, et 30 dans celui qui a trait aux beurreries et fromageries. Ajoutées à celles des bulletins ou tableaux ordinaires, ces questions forment un total de 623, ou 407 de plus que le nombre de celles contenues dans les tableaux du recensement de 1891.

Pour faire promptement et avec succès le recensement du pays et recueillir les renseignements voulus sur tant de sujets, il a été jugé à propos d'employer un plus grand nombre d'énumérateurs que par le passé, et de réduire le territoire assigné à chacun. Et comme l'objet principal d'un recensement est de déterminer le nombre des habitants en vue de rajuster la représentation au Parlement, on a pris comme unité territoriale d'énumération la division de votation telle que délimitée pour les élections générales de 1900.

L'énumération proprement dite s'est faite avec l'aide de 17 surveillants ou officiers principaux pour les provinces et les territoires ; de 351 officiers dirigeants et reviseurs ou commissaires et assistants commissaires pour les districts ou sous-districts ; et de 8,800 énumérateurs pour les divisions de votation ou arrondissements d'énumération. Chacun de ces énumérateurs a dû, avant de se mettre à l'œuvre et après avoir terminé ses travaux, prêter serment de fidélité et d'exactitude dans l'exercice de ses fonctions.* Dans le recensement de 1891, il avait été employé 14 officiers principaux, 241 commissaires et 4,324 énumérateurs. L'écart entre les nombres respectifs des officiers principaux pour les deux recensements représente ceux qui ont été nommés pour les Territoires non-organisés, dont un pour le Keewatin, un pour l'Athabaska et le Mackenzie, et un pour le Yukon. Chacun d'eux a eu la direction d'un certain nombre d'énumérateurs aux postes de commerce et à tous les autres centres pour le dénombrement de la population dans ces régions lointaines et peu habitées.

* Les formules de serment (n° 2 et n° 6) auxquelles chaque énumérateur a souscrit en commençant et en finissant son travail, sont les suivantes :—

N° 3. Je,.....duement nommé en vertu de l'"Acte du recensement", chapitre 58, Statuts revisés du Canada, 1886, pour être énumérateur du recensement, jure solennellement et sincèrement que je remplirai, au meilleur de mon habileté, fidèlement et exactement tous mes devoirs comme tel, conformément aux dispositions du dit acte, et de toute proclamation, et de tous Arrêtés du Conseil et instructions émises en conformité d'icelui. Ainsi que Dieu me soit en aide.

N° 6. Je.....duement nommé en vertu de l'"Acte du recensement", chapitre 58, Statuts revisés du Canada, 1886, pour être énumérateur du recensement, pour le sous-district.....dans le district n° .... jure solennellement et sincèrement que le retour, revisé et corrigé, et remis entre les mains du commissaire du dit district, est exact et au meilleur de ma connaissance un état correct et honnête des faits demandés par l'"Acte du recensement" et selon les instructions qui m'ont été données. Ainsi que Dieu me soit en aide.

Le temps alloué pour le dénombrement a demeuré était de 30 jours, à compter du 31 mars; mais il a fait partie des fonctions des commissaires de reviser tous les bulletins individuels avant de les transmettre au bureau du recensement, et cela a nécessairement pris beaucoup de temps. Cependant, bien que le nombre des questions fut presque trois fois plus grand qu'en 1891, les bulletins ont été reçus assez promptement. Dès avant le fin d'avril, dix pour cent de tous les cahiers avaient été reçus, 58 pour cent l'avaient été avant la fin de mai, 83 pour cent avant la fin de juin, 95 pour cent avant la fin de juillet et 98 pour cent avant la fin d'août. Le reste était, la plupart, pour les Territoires non-organisés et le nord de la Colombie-Britannique. Mais, pour cette dernière région, on a dû faire un deuxième dénombrement, vu que les premiers papiers ont été perdus dans le naufrage du steamer *Islander*. En 1891, un pour cent des cahiers avait été reçu à la fin d'avril, 41 pour cent à la fin de mai, 83 pour cent à la fin de juin, 96 pour cent à la fin de juillet et 99 pour cent à la fin d'août.

Le tableau suivant montre, par provinces et territoires le nombre des districts et sous-districts pour les recensements de 1891 et de 1901, ainsi que le nombre des énumérateurs employés respectivement à ces recensements :

| Provinces et Territoires. | Districts. | | Sous-districts. | | Enumérateurs. | |
|---|---|---|---|---|---|---|
| | 1901. | 1891. | 1901. | 1891. | 1901. | 1891. |
| Alberta | 1 | 1 | 134 | 3 | 139 | 24 |
| Assiniboia | 2 | 2 | 188 | 6 | 186 | 43 |
| Colombie-Britannique | 5 | 5 | 35 | 50 | 276 | 85 |
| Manitoba | 7 | 5 | 94 | 100 | 574 | 109 |
| Nouveau-Brunswick | 13 | 15 | 159 | 164 | 386 | 307 |
| Nouvelle-Ecosse | 17 | 19 | 454 | 380 | 565 | 477 |
| Ontario | 89 | 88 | 940 | 796 | 3,759 | 1,887 |
| Ile du Prince-Edouard | 5 | 3 | 70 | 70 | 149 | 166 |
| Québec | 65 | 61 | 1,019 | 903 | 2,592 | 1,272 |
| Saskatchewan | 1 | 1 | 68 | 3 | 64 | 14 |
| Territoires non-organisés | 1 | 1 | 43 | — | 110 | — |
| Totaux | 206 | 201 | 3,201 | 2,475 | 8,800 | 4,324 |

Quand il s'est agi de déterminer la rémunération des énumérateurs, on a reconnu que l'étendue de l'investigation étant beaucoup plus grande qu'en 1891, il y avait lieu de mettre à des chiffres plus élevés que par le passé l'échelle de rétribution que l'article 24 de l'acte du recensement autorise le ministre de l'Agriculture à préparer, et, en conséquence, il a été adopté une échelle qui a paru au ministre suffisamment libérale pour permettre à un énumérateur diligent de gagner un maximum de $3 par jour, que la loi

autorise de payer. Le tableau suivant est celui de la rétribution des énumérateurs pour 1901 et 1891 respectivement, dans toutes les provinces anciennes du Dominion :

| | 1901. | 1891. |
|---|---|---|
| Pour chaque personne vivante | 5c. | 3c. |
| Pour chaque décès | 5c. | 3c. |
| Pour chaque ferme | 25c. | 15c. |
| Pour chaque établissement industriel | 30c. | 20c. |

L'augmentation est donc, pour cette échelle, de 58½ pour cent. Mais dans les parties rurales de ces provinces, afin de permettre aux énumérateurs de parcourir leur territoire et faire leur service plus facilement et en moins de temps, on a alloué $1.50 de plus par jour pour l'usage d'un cheval. Une tombée de neige extraordinaire et, en certains endroits, l'état presque impassable des chemins ont sérieusement fait obstacle au service, mais il n'y a pas de doute qu'il y a eu économie à payer le supplément pour le cheval.

Dans les parties de l'Ontario et de la province de Québec, où la population est relativement rare et les distances sont longues, on a adopté le tarif maximum de $3 par jour avec une allocation pour frais de route. On a fixé la même rémunération pour le Manitoba et les territoires du Nord-Ouest, avec dépenses réelles dans les régions rurales, jusqu'à un maximum de $5 par jour. Dans la Colombie-Britannique, où les gages sont plus élevés que dans toute autre partie du pays jouissant d'un gouvernement organisé, le maximum de la rétribution des énumérateurs a été fixé à $8.50 par jour. Mais partout où la rémunération a été de tant par jour, le compte a dû être appuyé d'une déclaration sous serment de la part de l'énumérateur.

L'accroissement de 275,330 du chiffre de la population du Manitoba, des Territoires du Nord-Ouest et de la Colombie-Britannique, et la vaste étendue de nouveau territoire parcourue par les énumérateurs, comme on peut le voir par le nombre plus élevé des sous-districts, ont contribué à augmenter le coût du recensement dans ces régions. Les deux provinces et les trois territoires présentent une étendue totale de 744,742 milles carrés, et leur population est moins de 1 habitant par mille carré, étant 796 par 1,000 milles carrés. La région est en partie traversée par de grandes chaînes de montagnes, et en partie formée d'une vaste plaine, et sur la plaine comme dans la montagne, le meilleur chemin n'est souvent qu'un sentier ou une route à peine battue. A mesure que le pays se couvrira de colons, viendront les bons chemins et les ponts pour en traverser les nombreuses rivières et les cours d'eau ; mais, pour le présent, la tâche d'y faire un recensement est nécessairement difficile et dispendieuse.

Pour la première fois au présent recensement on a entrepris le dénombrement des territoires non-organisés du Keewatin, de l'Athabaska, du Mackenzie et du Yukon. Pour ce service, on a employé 110 énumérateurs, avec des porteurs et des canotiers pour les aider à traverser le pays, et partout où ils rencontraient des gens—dans les camps de mineurs, dans les pêcheries, aux postes de commerce ou dans les stations de missionnaires—ils en prenaient note nominativement, de la façon ordinaire. Mais pour plus de commodité on s'est servi pour ces territoires de formules spéciales contenant un nombre de données plus restreint. La tâche était rude et souvent périlleuse pour ceux qui en étaient chargés ; mais c'est un grand plaisir que de pouvoir constater que le recensement s'est fait sans une seule perte de vie, ni dans ces régions lointaines ni en aucun autre endroit de notre vaste Dominion.

Les extraits suivants des Instructions aux officiers principaux, aux commissaires et aux énumérateurs, feront comprendre le plan général du recensement et jetteront de la lumière sur la partie qui fait la matière du présent volume.

## INSTRUCTIONS AUX OFFICIERS

1. En vertu des dispositions de l'Acte du recensement (Statuts revisés du Canada, 1886, c. 58) le Quatrième Recensement du Canada doit être fait cette année afin de constater avec toute l'exactitude possible, dans les différentes divisions territoriales du pays, la population, classée par âge, sexe, état civil des personnes, mâle, âge d'émancipation, enfants, [illegible], profession, et autres désignations, et tout autre renseignement exigé dans les formules et les instructions qui seront émises et employées tel que le veut l'Acte.

2. L'Acte ne détermine pas le plan du recensement en ce qui concerne le détail des renseignements, les formules à employer, le mode à suivre, ni les dates auxquelles se rapportera le recensement, mais il statue qu'il devra être procédé par proclamation du Gouverneur en conseil.

3. Le détail des renseignements et les formules à employer pour le Quatrième Recensement sont tels qu'indiqués dans les tableaux annexés dans la proclamation du Gouverneur en conseil, faite le 8 du présent mois de janvier, et publiée le 15 dans un supplément de la *Gazette du Canada*, et conformément aux instructions et aux formules qui seront émises par le ministre de l'Agriculture pour son opération.

La proclamation statue et prescrit aussi :

"1. Que la population à enregistrer sera la population en existence le 31e jour de mars A.D. 1901, et que tout autre renseignement à recueillir se rapportera aussi à la même date, à moins qu'il ne soit autrement déterminé par Notre Ministre de l'Agriculture pour le Canada à l'égard des renseignements dans les tableaux 5, 10 et 11. Que le mode à suivre pour obtenir l'énumération de la population sera celui connu sous la dénomination de système de jure.

"2. Que la division du pays en districts et sous-districts de recensement correspondra respectivement, autant que possible, aux divisions et aux subdivisions électorales existantes, et que, sauf tel que pourra le prescrire autrement Notre Ministre de l'Agriculture, les unités d'énumération pour les fins de recensement seront les subdivisions de votation des diverses divisions électorales pour les récentes élections parlementaires ; sous que dans les territoires qui ne seront pas délimités ni situés de manière que l'on puisse adopter les circonscriptions déjà établies, des divisions et subdivisions spéciales seront formées pour les fins du recensement par autorité de Notre Ministre de l'Agriculture.

"3. Que les sous-districts d'un district de recensement se composeront ordinairement de cantons, paroisses, cités, villes et villages incorporés.

"4. Que les officiers du recensement, établis par l'article 8 de l'*Acte du recensement*, seront au nombre de quatre pour chacune des provinces d'Ontario et de Québec, et d'un pour chacune des autres provinces et les Territoires du Nord-Ouest, dont le devoir sera d'instruire les commissaires du recensement dans la méthode et le travail du recensement.

"5. Qu'il y aura un commissaire du recensement pour chaque district de recensement, ou deux commissaires si le district est de grande étendue, ou contient une forte population bilingue, ou comprend plus qu'une municipalité de comté, et un énumérateur pour chaque subdivision de votation ou pour un groupe de subdivisions de votation lorsque Notre Ministre de l'Agriculture le déterminera, dans certains cas ; et les devoirs de ces officiers et le délai dans lequel ils devront compléter leurs retours et rapports, seront tels qu'établis par l'Acte et en conformité des règlements et instructions autorisés par l'Acte, ou tel que le déterminera Notre Ministre de l'Agriculture dans des cas spéciaux.

"6. Que vu que dans l'enregistrement des maladies ou des causes de décès, la nomenclature Bertillon est déjà en usage dans les provinces d'Ontario et de Québec et dans la République du Mexique, et a été recommandée pour l'adoption le 1er janvier A.D. 1901, pour une période de dix ans par les délégués de dix-huit pays à la Convention Internationale qui s'est réunie à Paris, en l'année 1900, pour étudier le sujet (y compris le délégué des États-Unis), et vu que l'uniformité de la statistique est essentielle pour faire des études comparatives de mortalité, il est judicieux de suivre la nomenclature Bertillon ou Internationale en faisant le recensement de la Mortalité (tableau 3) ; et que, pour avoir une énumération aussi complète que possible des maladies ou causes de décès, il est de plus judicieux d'obtenir la coopération des bureaux provinciaux ou autres bureaux locaux de statistique vitale là où de tels bureaux ont été organisés, en vertu d'arrangements et conditions que sanctionnera Notre Ministre de l'Agriculture.

"7. Que selon que le déterminera Notre Ministre de l'Agriculture, et sujet aux limitations de territoire et d'industries, le recensement des Manufactures (tableau 8) et le recensement des Produits de la forêt (tableau 9) puissent être confiés à un ou plusieurs agents spéciaux dans chaque province ; le recensement des Pêcheries (tableau 10) sujet aux limitations de territoire, à un ou plusieurs agents spéciaux ou au département de la Marine et des Pêcheries, ou, dans le cas de toute province qui s'est chargée de l'administration des pêcheries en vertu de la décision du Conseil privé, à l'officier provincial chargé de telle administration ; et le recensement des Mines et Minéraux (tableau 11) sujet à telles limitations de territoire et des exigences ou espèces de produits minéraux que Notre Ministre de l'Agriculture déterminera, aux énumérateurs ordinaires, à des agents spéciaux ou à la Commission Géologique, selon qu'il sera jugé dans chaque cas plus avantageux et à propos.

4. La date décisive pour enregistrer la population est la même que la date fixée par le parlement impérial pour opérer le recensement de la Grande-Bretagne, étant dimanche le 31e jour de mars. L'heure décisive du compte est fixée à 12 heures en minuit dans la nuit du 31 mars au 1er avril, de sorte que tous ceux nés avant cette heure et tous ceux morts après cette heure doivent être comptés dans la population.

5. En prescrivant que le recensement sera effectué d'après le système *de jure*, la proclamation ne donne pas de définition à ce terme ; non plus que "l'Acte du recensement", ni aucun autre statut. Cela doit être entendu, en grande partie, par l'usage, et, par conséquent, on devra suivre avec une exactitude assez raisonnable le mode adopté dans les recensements antérieurs en Canada. Dans le cas d'une grande majorité des gens, leur foyer ou place habituelle de résidence est l'endroit où ils doivent être comptés ; mais des instructions spéciales sont données en rapport au tableau n° 1.

6. Les districts de recensement devront correspondre autant que possible aux districts électoraux pour la Chambre des Communes, à Ottawa, et les sous-districts aux cités, villes, villages incorporés, cantons et paroisses qui constituent un district électoral. Mais pour que le travail du recensement soit bien et rapidement fait, les subdivisions de votation doivent être, règle générale, les unités d'énumération. Dans le cas où elles sont de peu d'étendue et où les habitants sont peu nombreux, deux subdivisions de votation ou plus seront assignées à un énumérateur.

7. L'*Acte du recensement* pourvoit à trois classes d'officiers pour le service extérieur. La première classe comprend les officiers en chef représentant les provinces et territoires du Canada, qui recevront des instructions au bureau du recensement à Ottawa, sur la méthode et le travail du recensement, et qui donneront à leur tour des instructions aux commissaires. La seconde classe comprend les commissaires qui auront la direction du travail dans les divers districts pour lesquels ils ont été nommés. Ils devront instruire les énumérateurs dans les détails de la prise du recensement tel que requis par les tableaux, reviser le travail quand il est fait, et transmettre tous papiers au bureau du recensement avec lequel ils échangeront toute la correspondance nécessaire. La troisième classe comprend les énumérateurs auxquels sera confié le travail réel du recensement, et du jugement, de la discrétion et de l'intelligence desquels la perfection et l'exactitude du recensement dépend en très grande partie. Le recensement doit être effectué, et tous les rapports faits au bureau à Ottawa, à une époque qui sera fixée dans les instructions spéciales à chaque commissaire ; et à moins qu'il ne soit autrement prescrit dans les instructions, chaque énumérateur devra commencer son travail lundi le 1er jour d'avril, et il le continuera de jour en jour (excepté les dimanches) jusqu'à ce que le recensement de son district soit terminé.

8. En prenant le recensement de la mortalité, les cause de décès seront inscrites conformément à la nomenclature Bertillon ou Internationale (ou noms des maladies), imprimée sur le dos du Tableau-Exemple n° 3. L'expérience prouve que dans un système organisé d'enregistrement journalier ou hebdomadaire il est extrêmement difficile d'obtenir des rapports complets de mortalité couvrant une période de douze mois et, par conséquent, il a été décidé de fournir aux commissaires des listes obtenues des bureaux d'enregistrement provinciaux ou municipaux où ceux-ci existent, pour l'usage des énumérateurs. Ces listes sont pour les premiers neuf mois de l'année de recensement commençant avec avril et finissant avec décembre 1900.

9. Pour l'énumération des personnes vivant dans des asiles, hôpitaux, pénitenciers, et institutions d'éducation et autres, aussi bien que les Sauvages sous traité, et pour recueillir les statistiques des manufactures, produits forestiers, pêcheries et minéraux, on trouvera généralement avantageux d'employer des fonctionnaires et autres agents au lieu des énumérateurs réguliers. Dans chaque cas de ce genre le commissaire pour le district sera notifié, et sera requis de retirer les tableaux traitant des sujets particuliers d'entre les mains des énumérateurs réguliers et de les notifier en conséquence.

10. Le bureau du recensement à Ottawa fournira aux commissaires de districts de recensement les tableaux, instructions et tous autres imprimés nécessaires à la prise du recensement, lesquels devront être distribués aux énumérateurs quand ceux-ci seront rassemblés pour recevoir les instructions touchant leur travail.

11. Le nombre de tableaux suffisant pour les besoins de chaque énumérateur, proportionné à l'étendue et à la population du territoire à lui assigné, sera mis dans un carton ou portefeuille afin de les garder intacts et propres durant la durée de son travail. Il peut fréquemment arriver que dans certaines localités quelques-uns des tableaux ne soient pas du tout requis, ou cela en quantité très limitée, et il sera du devoir du commissaire vis-à-vis de chaque énumérateur de s'assurer des sortes de tableaux et du nombre de feuilles de chacun dont on aura besoin. Dans les villages et villes, par exemple, on aura besoin d'un plus petit nombre des tableaux 4, 5, 6 et 7 que des tableaux 1 et 2, tandis que dans les districts ruraux un nombre comparativement plus petit d'exemplaires du tableau 8 (Manufactures) sera requis que dans les villages et villes. Dans le cas du tableau 3 (Mortalité) une estimation du nombre de feuilles requises peut être faite sur la base de 20 décès dans l'année pour chaque 1,000 de la population.

12. Les commissaires auront soin de diriger les énumérateurs de manière à ce qu'ils comprennent entièrement et clairement chaque détail de leurs devoirs, (1) en ce qui regarde l'étendue de territoire ou unité d'énumération que chacun devra parcourir, (2) quant aux entrées à être faites dans les divers tableaux, et (3) quant aux rapports à faire aux commissaires de tous tableaux et papiers lorsque le recensement de la partie du territoire assignée à chacun d'eux sera terminé.

13. Un des devoirs spéciaux des commissaires est de constater et définir par descriptions écrites, pour la gouverne de chaque énumérateur, les bornes du territoire assigné à celui-ci, afin que nulle partie du district de recensement ne soit omise ou inscrite par plus d'un énumérateur.

14. Le travail de la prise du recensement devra commencer à quelque point de départ bien établi, que ce soit dans un canton ou une paroisse, ou dans une cité, ville ou village, et devra être poursuivi conti-

nément et régulièrement, qu'il soit une subdivision de recensement ou plus, ou un territoire de plus grande

15. Dans un canton, une paroisse ou un autre district rural, où les habitations sont disséminées, il est préférable de commencer sur un chemin de grande route à la limite du district et de visiter successivement chaque maison, jusqu'à ce que l'autre côté du district soit atteint, alors que le chemin voisin peut être suivi de la même manière, et ainsi de suite jusqu'à ce que tout le territoire assigné à l'énumérateur soit couvert, avant de commencer à remplir le recensement d'une ferme ou d'un lot avant de passer au suivant.

16. Si un village non incorporé est inclus dans le district de l'énumérateur, il devra en prendre le recensement séparément de la partie rurale proprement dite, mais sur le même tableau. Une ligne courte tirée au travers de la marge gauche au-dessus du numéro de la première famille et une autre ligne au-dessous du numéro de la dernière famille du village telle qu'entrée sur le tableau, seront une marque suffisante de séparation. Mais si le village porte un nom distinct, il devra être écrit le long de la marge gauche du tableau, entre la ligne du haut et la ligne du bas. Cette séparation facilitera la tabulation des statistiques agricoles, et pourra avoir de la valeur comme document en faisant l'histoire de l'origine des villes futures dans le pays. Le recensement des villages non incorporés, cependant, sera inclus, comme jusqu'ici, dans les statistiques des sections rurales.

17. Dans les cités, villes et villages incorporés, où le territoire est habituellement divisé en blocs ou carrés bornés de quatre côtés par des rues, l'énumérateur devra commencer à un coin du bloc et le continuer, suivant dans chaque maison ou bâtisse occupée, en ordre régulier, et recueillant tous les renseignements exigés dans les tableaux, avant de passer au bloc ou carré suivant, et il devra continuer ainsi jusqu'à ce que tout son district de recensement soit fini.

18. Si le district de l'énumérateur est partie dans une ville ou un village incorporé et partie dans la campagne, il devra enregistrer les deux parties séparément, comme décrit plus haut dans le paragraphe 16, et établir la distinction entre les deux parties si clairement qu'il ne puisse résulter, au bureau du recensement à Ottawa, aucune erreur dans le travail de tabulation par la confusion des districts ruraux ou urbains.

19. Dans tout endroit où se fait la culture du grain, des fruits et des légumes, et où l'on garde des animaux domestiques, et où sont plantés des arbres d'ornement ou autres, dans les cités, villes et villages, on devra en recueillir les statistiques (comprenant la valeur) avec autant de soin que les statistiques des récoltes et des animaux sur les fermes : comme aussi l'étendue de terrain occupé et le nombre de granges et autres bâtiments à l'usage du chef ou de tout autre membre de chaque famille ou ménage.

20. Le chef de chaque famille ou ménage (ou quiconque donne les renseignements s'y rapportant) devra être questionné sur les détails de tous les tableaux, à moins que l'un d'eux ait été retiré des mains de l'énumérateur, de sorte qu'il puisse être recueilli des renseignements complets couvrant toute la portée du recensement pour chaque partie du pays.

21. Si les tableaux ont été retirés, il sera encore du devoir de l'énumérateur régulier de s'enquérir et de faire rapport de l'institution ou de l'industrie et du nom et de l'adresse de son propriétaire, gérant, agent en officier en charge, au commissaire de son district, qui expédiera immédiatement les détails des renseignements au bureau du recensement à Ottawa, pour l'usage de l'agent spécial qui pourra être nommé pour faire le recensement de telle institution ou industrie.

22. Tout commissaire, énumérateur ou autre employé à l'exécution de l'*Acte du recensement* doit faire et souscrire le serment l'engageant à l'accomplissement fidèle et exact de ses devoirs en vertu des dispositions de l'Acte, et sous tous rapports tel que prescrit par les formules et instructions émises par le ministre de l'Agriculture ; et toute telle personne qui manque volontairement en quelque chose aux devoirs que lui impose l'Acte ou les instructions, ou qui fait volontairement une fausse énonciation dans l'exécution de ses devoirs est coupable de délit.

23. Tout officier ou autre personne employée en quelque qualité au travail du recensement doit garder secrets les renseignements recueillis par les énumérateurs et inscrits dans les tableaux ou formules. Il n'est pas permis à un énumérateur de montrer ses tableaux à aucune autre personne, ni d'en faire ou d'en garder une copie, ni de répondre à aucune question concernant leur contenu, directement ou indirectement ; et la même obligation de secret est imposée aux commissaires et autres officiers ou employés du service extérieur, aussi bien qu'à tout officier, commis ou autre employé du bureau du recensement à Ottawa.

24. Nul résultat de l'énumération, ne sera communiqué au public avant la publication des bulletins imprimés en rapports, sauf par l'officier en chef du recensement, agissant sous l'autorité et d'après les ordres du ministre de l'Agriculture.

25. Il n'est pas permis à un commissaire, énumérateur ou autre employé du recensement d'engager un remplaçant ou d'affermer son travail à un autre. La position à laquelle il est nommé doit être remplie par

lui-même, et ses devoirs doivent être accomplis par lui-même. Un service prompt et diligent est exigé du jour où le travail commence jusqu'à ce qu'il soit achevé.

26. Il est du devoir d'un énumérateur en entrant dans une maison d'agir avec politesse, de mentionner son but en quelques mots, de poser les questions nécessaires, de faire les entrées requises, et de se retirer aussitôt que son devoir est rempli. Sa conduite doit être judicieuse, et ce n'est que lorsque les personnes refusent de répondre aux questions ou de donner les renseignements requis que des procédures légales peuvent être prises contre elles.

27. A moins qu'il n'en soit prescrit autrement dans les instructions détaillées, l'année du recensement sera l'année commençant le 1er avril 1900 et finissant le 31 mars 1901 pour toutes questions et sujets dans les tableaux 1, 2, 3, 4, 5, 6 et 7, et l'année commençant le 1er janvier et finissant le 31 décembre 1900, pour toutes questions et sujets dans les tableaux 8, 9, 10 et 11.

28. A moins qu'il ne soit autrement prescrit pour des localités particulières, les énumérateurs devront commencer à faire le recensement de leurs districts respectifs lundi, le premier jour d'avril, et le poursuivre continûment de jour en jour, excepté les dimanches, jusqu'à ce qu'il soit achevé.

29. La journée de travail des officiers du recensement, commissaires, énumérateurs et autres employés pour l'opération du recensement sera de huit heures de service effectif prouvé, et tout travail supplémentaire sera compté comme partie d'une journée au même taux d'appointements que prescrit pour une journée de travail. Dix heures de service effectif prouvé compteront pour un jour et un quart, et douze heures pour un jour et demi.

30. Pour les autres devoirs des officiers de recensement des diverses classes, tel que prescrit particulièrement dans les clauses 11 et 12 de l'Acte, et aussi pour l'autorité en vertu de laquelle ils pourront procéder à la recherche de tout détail de renseignements prescrit dans les tableaux, on s'en rapportera à l'Acte du recensement publié avec les présentes instructions tel que prescrit dans les clauses 16, 17, 18, 19 et autres de l'Acte.

INSTRUCTIONS CONCERNANT TOUS LES TABLEAUX.

31. Le commissaire remplira les blancs dans l'en-tête de chaque tableau en y inscrivant avec le nom de la province ou du territoire, le nom du district électoral, le numéro de la subdivision de votation ou autre unité d'énumération, et le nom de la cité, ville, village, canton ou paroisse où est situé la subdivision de votation ou unité d'énumération, comme l'exigent les blancs dans l'en-tête de chaque tableau ; et il fournira à chaque énumérateur une copie écrite ou imprimée des bornes du territoire qui lui est assigné, que ce soit une subdivision de votation ou un territoire de plus grande ou de moindre étendue.

32. L'énumérateur étudiera avec grand soin la description écrite des bornes du territoire qui lui est assigné (tel que prescrit par les Instructions nos 13 et 31), de manière à ce qu'il en ait une connaissance parfaite. Il devra se familiariser non seulement avec les bornes précises de son territoire, mais aussi avec toute partie de celui-ci, soit rurale ou urbaine, afin que les terres agraires puissent être distinctement séparées des villes, villages et hameaux ou parties de tels centres de population. Il prendra soin d'éclaircir tout doute qui pourrait exister concernant les bornes entre son propre territoire et les territoires d'énumération voisins, afin de s'assurer que pas une seule maison ou parcelle de terrain ne soit omise dans l'énumération et que pas une non plus ne soit incluse qui appartient au territoire d'un autre énumérateur.

33. Dans quelques régions peu populeuses, plusieurs cantons ou paroisses peuvent être groupées pour former une subdivision de votation ou unité d'énumération assignée à un énumérateur, et là où ceci a lieu le nom de chaque canton ou paroisse devra être inscrit dans la ligne en blanc. Mais dans chacun de ces cas le nom de chaque canton ou paroisse devra aussi être écrit par l'énumérateur dans la marge gauche de la feuille, tel que prescrit dans le n° 16 de ces Instructions ci, de sorte que le recensement de chacun puisse être séparé et distinct.

34. Là où deux cantons ou paroisses, ou plus, sont unis pour constituer une municipalité on suivra les mêmes instructions, afin de permettre d'y référer plus tard et pour comparaison quand chacun de ces cantons ou paroisses sera constitué en une municipalité distincte.

35. Le numéro de chaque page sera inscrit consécutivement sur les feuilles dans les blancs laissés à cette fin dans les entêtes, et quand une page sera remplie, l'énumérateur signera son nom dans le blanc laissé à cet effet dans l'en-tête. Il devra aussi inscrire après le mot "Enumérateur" le jour ou les jours où la feuille a été remplie, ainsi : 2 avril, ou 3-5 avril, ou quelque soit le cas.

36. L'énumérateur devra faire toutes les entrées dans les tableaux avec de l'encre de bonne qualité, et chaque nom, mot, chiffre ou marque devra être clair et lisible. Si un tableau ne peut pas être lu, ou si les entrées sont faites avec de l'encre de qualité inférieure, ou au crayon, ou si elles sont indistinctes ou

[illegible] le travail de l'énumérateur peut être complètement perdu. Le recensement est destiné à former un [illegible] permanents gouvernement, et ses tableaux seront conservés dans les archives du Canada.

37. Chaque famille des tableaux ou autres formules spéciales, remplie en noir, gâtée en noir, devra être [illegible] par l'énumérateur au commissaire, et par le commissaire au bureau du recensement à Ottawa.

38. Les commissaires de recensement et les énumérateurs devront lire toutes les instructions à la [illegible] des Tableaux Modèles 1, 2 et 3, qui sont donnés pour illustrer clairement le sens dans lequel chaque [illegible] de la [illegible] doit être rempli. S'il existe quelque doute dans l'esprit du commissaire sur quelque point qui [illegible] avant ou après le commencement du travail du recensement, il devra de suite en faire part au [illegible] du recensement ; et s'il y avait quelque incertitude dans l'esprit du commissaire il devra s'adresser à [illegible] du recensement qui lui a donné ses instructions, ou à l'officier en chef du recensement à Ottawa.

INSTRUCTIONS POUR LE TABLEAU N° 1.

39. Le tableau n° 1 est dressé dans le but d'énumérer la population du pays par noms. Le nom de chaque personne dont le domicile habituel ou lieu d'habitation est dans le district d'un énumérateur, dans une [illegible] quelconque du Canada, doit être inscrit sur le tableau, sans égard à l'âge, le sexe ou l'état civil—le chef de la famille ou du ménage étant inscrit le premier, et les autres membres en ordre régulier.

41. Dans les colonnes 1 et 2, la demeure et la famille ou ménage seront numérotées dans l'ordre des visites, et vu que dans la même maison il peut y avoir une ou plusieurs familles ou ménages, le numérotage sous les deux en-têtes du tableau ne correspondra nécessairement pas. Telle que définie dans l'Acte du recensement, l'expression "maison" comprend navires, bâtiments, vaisseaux, logements ou lieux habités de toute espèce. Toute construction qui abrite un être humain est une maison, et si elle n'a qu'une entrée elle compte seulement comme une habitation, n'importe le nombre de familles qu'elle abrite ; mais si elle a deux portes de devant ou portes principales conduisant dans des appartements séparés, la construction sera comptée comme deux maisons.

42. Pour les fins du recensement la population est groupée sous les en-têtes de "familles", "ménages" et "institutions". Dans le sens restreint de l'expression, une famille se compose de parents et de fils et filles vivant ensemble en communauté ; mais dans un sens plus large elle peut comprendre les parents et serviteurs. Un ménage peut comprendre toutes personnes vivant en commun, qu'elles soient ou non unies par les liens du sang, mais dont un de leur nombre occupe ordinairement la position de chef. Mais les célibataires vivant seuls, qui ont une habitation spéciale et tiennent leur propre ménage, doivent aussi être considérés comme ménages. D'autres qui vivent seuls, tels que ceux qui louent des chambres et ne font que coucher dans la maison, seront compris dans la liste des ménages chez qui ils logent, bien qu'ils prennent leurs repas ailleurs. Un ménage d'institution comprend les établissements tels que hôpitaux, asiles, maisons des pauvres, prisons, pénitenciers, collèges, casernes, etc., dont les internes, s'ils n'ont pas de domicile ou famille en dehors de l'institution, doivent être inscrits sous le nom de l'institution. Les domestiques, cuisiniers, etc., d'une institution ne doivent pas être comptés au nombre des hôtes ou internés, mais avec le personnel du chef de l'institution, ou avec leur propre ménage ou autre ménage dont ils forment partie.

43. Les chefs de famille, ménages et institutions sont requis de fournir à l'énumérateur tous les détails relatifs à chaque personne dans la famille, ménage ou institution, tel que stipulé dans les tableaux.

44. En inscrivant les noms de toutes les personnes dans une famille ou ménage dans la colonne 3, il n'y aura pas de doute quant à une grande majorité de la population. Leurs foyers sont fixés et connus. Mais dans chaque cas où des membres d'une famille ou d'un ménage sont temporairement absents de leur foyer ou lieu ordinaire d'habitation, leurs noms et condition seront inscrits de manière à se conformer aussi près que possible à l'idée générale d'un système d'énumération *de jure*. Le nom de baptême et le surnom de chaque personne doivent être inscrits en toutes lettres dans cette colonne, mais si la personne a deux prénoms il suffira d'écrire l'initiale du second.

47. Les races d'hommes seront désignées par l'emploi des lettres "b" pour blanche, "r" pour rouge, "n" pour noire, et "j" pour jaune. Les blancs sont naturellement la race caucasienne, les rouges les Sauvages d'Amérique, les noirs sont les Africains ou nègres, et les jaunes sont les Mongols (Japonais et Chinois). Mais il n'y a que les blancs purs qui seront classés comme blancs ; les enfants nés de mariages entre des blancs et quelqu'autre des races pourront être classés comme rouges, noirs ou jaunes, selon le cas, quel que soit le degré de couleur.

48. Dans la colonne 6 le chef de chaque famille ou ménage sera inscrit comme tel, et tous les autres selon le degré de parenté, tel que épouse, fils, fille servante, pensionnaire, locataire, associé, etc. Dans une institution, les personnes peuvent être décrites comme officier interne, patient, prisonnier, élève, etc.

49. Dans la colonne 7 la description sera donnée au moyen de la lettre initiale "c" pour célibataire, "m" pour marié, "v" pour veuf ou veuve, et "d" pour divorcé. Les personnes séparées de corps seront inscrites comme mariées.

51. En désignant le pays ou lieu de naissance il suffira, dans le cas de toutes personnes nées hors du Canada, de donner le nom du pays, tel que Angleterre, France, Allemagne ou les Etats-Unis, sans donner les noms de subdivisions plus petites. Si la personne est née au Canada, le nom de la province ou territoire devra être donné, car cela servira à indiquer la tendance vers la migration. Il importe aussi, dans tous les cas, de savoir si la personne est née à la campagne ou en ville, ce qui sera indiqué en ajoutant la lettre "r" pour rural, ou la lettre "u" pour urbain, selon le cas. Ainsi, une personne née dans une ville dans la Nouvelle-Ecosse sera décrite dans la colonne 11 comme "N.-E. u", ou si elle est née sur une ferme dans Québec, comme "Q. r".

52. Si la personne est née à l'étranger, l'année d'immigration au Canada sera inscrite dans la colonne 12; et si elle est née dans quelque pays autre que le Royaume-Uni ou aucune de ses colonies ou dépendances, l'année dans laquelle la personne a été naturalisée et a acquis les droits de citoyenneté devra être inscrite dans la colonne 13. Si la personne a demandé des papiers de naturalisation, mais n'a pas encore atteint le plein droit de citoyenneté, le fait devra être indiqué en écrivant dans la colonne les lettres "pa".

53. Parmi les blancs, l'origine selon la race ou la tribu est tirée du père, tel que Anglais, Ecossais, Irlandais, Gallois, Français, Allemand, Italien, Scandinave, etc. Il faut avoir soin, toutefois, de ne pas appliquer les termes "Américain" ou "Canadien" dans le sens de race, vu qu'il n'y a pas de races d'hommes ainsi appelées. "Japonais", "Chinois" et "Nègre" sont des termes propres de race; mais dans le cas des Sauvages les noms de leurs tribus devront être donnés tel que "Chippewa", "Cri", etc. Les personnes de sang mêlé blanc et rouge—communément appelés "métis" seront décrites par l'addition des lettres initiales "m. f." pour métis français, "m. a." pour métis anglais, "m. e." pour métis écossais, et "m. i." pour métis irlandais. Par exemple: Cri m. f. indique que la personne est de race mixte crie et française; et Chippewa m. e. indique que la personne est Chippewa et Ecossaise. D'autres mélanges de Sauvages, à part ceux ci-dessus cités, sont rares, et peuvent être décrits par les lettres "a. r." Si plusieurs races sont combinées avec la rouge, tels que les Anglais, Ecossais, Irlandais et Français, ou toute autre race, elles devront aussi être décrites par les initiales "a. r." Une personne dont le père est Anglais, mais dont la mère est Ecossaise, Irlandaise, Française ou de toute autre race, sera classée comme Anglaise, et ainsi pour les autres dans la race blanche—la ligne descendante étant tirée du père.

54. Nationalité est un terme plus ou moins de convention, mais vu qu'il s'applique par droit d'usage aux citoyens du Canada—l'expression nouvelle nationalité a été introduite en ce sens dans le discours du Gouverneur général à l'ouverture du premier parlement du Canada—il convient d'employer le mot Canadien dans la colonne 15 pour décrire toute personne dont le foyer est dans le pays et qui y a acquis des droits de citoyenneté. Une personne qui est née aux Etats-Unis, ou en France, ou en Allemagne ou dans un autre pays étranger, mais dont le foyer est en Canada et qui est un citoyen naturalisé devra être inscrit comme Canadien; de même pour une personne née dans le Royaume-Uni ou aucune de ses colonies, dont la résidence au Canada n'est pas simplement temporaire. Un aubain sera classifié par nationalité selon le pays de sa naissance, et le pays auquel il prétend devoir allégeance.

55. La religion de chaque personne sera inscrite selon ce qu'elle professe, spécifiant l'église ou secte à laquelle la personne appartient. Si les fils ou filles appartiennent à une église ou secte autre que celle de leurs parents, ou de l'un d'eux, l'inscription convenable devra être faite, mais sauf dans ces cas ils devront être classifiés avec leurs parents. La classification des gens selon leur croyance religieuse ne doit omettre ni négliger aucune église ou secte ou forme de croyance, sauf dans le cas d'une église ou secte qui aurait perdu son identité en s'unissant à une autre église ou secte, ou de quelque autre manière. Il n'y a pas d'Eglise de l'Etat en Canada, et si une personne n'est pas membre ou n'adhère pas ou ne soutient pas une église ou une secte en particulier, elle ne doit être classée dans aucune.

56. Dans les colonnes 17 à 21 inclusivement, l'énumérateur inscrira la profession, occupation, métier ou moyen de subsistance du chef et des autres membres de la famille et indiquera les positions qu'ils occupent tels que rentiers, patrons, employés, ou travaillant à leur propre compte.

57. La première ou principale occupation est la seule qui devra être inscrite; c'est-à-dire, celle dont dépend principalement la condition de vie et dont sont principalement dérivés les gages, émoluments ou revenus.

58. Les expressions telles que "manufacturier", "marchand", et "ouvrier" sont insuffisantes; la classe particulière d'industrie, ou métier, ou profession ou autre occupation à laquelle la personne énumérée est employée devrait être donnée. Les ouvriers et les journaliers devraient toujours spécifier le genre de travail ou d'affaires auxquels ils s'adonnent habituellement comme ouvrier de ferme. Si la personne est un

[illegible] manufacturier en indiquant le genre de travaux après le terme ouvrier, ainsi : "ouvrier (travaux de bois)". Si c'est un ouvrier expert, spécifier, en outre du nom général de l'industrie à laquelle il est employé, la branche particulière à laquelle il travaille et les matériaux qu'il emploie, comme "finisseur de voiture", "tisseur de coton", etc. Si la personne n'est retirée de son emploi rémunérateur ou occupation lucrative indiquera en donnant la lettre "r" à la description.

[illegible] pour les personnes qui vivent de leurs propres ressources, comme [illegible], etc., pour les personnes qui sont patrons, comme les propriétaires de moulins, grands agriculteurs, etc., dont le travail est fait par d'autres auxquels des salaires ou gages sont payés ; pour les patrons qui travaillent à salaire ou gages ; et pour les personnes occupées à un travail [illegible] quelque ouvrage, les entrées convenables seront faites dans les colonnes 18, 19, 20 et 21 respectivement. Une réponse affirmative sera indiquée par le trait vertical ( | ) et une réponse négative par le tiret (—) dans la colonne convenable.

10. Si les femmes mariées, d'autres femmes dépendantes ou des enfants poursuivent une occupation [illegible] salaire en quelque qualité que ce soit, le genre d'occupation sera donné, et ils seront [illegible] comme gagistes ou employés, selon le cas ; mais s'ils ne s'occupent qu'aux travaux domestiques dans un ménage, sans salaire, ils ne doivent pas être classifiés comme ayant une occupation. Une personne travaillant à la pièce à son domicile sera inscrite conformément à son occupation, qu'elle soit employée en vertu d'un contrat ou entente avec un manufacturier ou autre patron, ou comme aide à la personne ainsi employée.

11. Le rang dans l'emploi principal ou occupation doit être clairement indiqué, de sorte qu'on puisse reconnaître exactement si la personne énumérée est (1) un gérant d'affaires indépendant ; ou (2) appartient au bureau de direction comme gérant, commis de confiance, teneur de livres, commis aux travaux, caissier, [illegible], contre-maître ou autre officier dirigeant ; ou (3) est en qualité d'ouvrier (comme compagnon, assistant, apprenti, manœuvre, ouvrier, garçon de table ou de comptoir, commis aux ventes, journalier, terrassier, [illegible], charretier, valet d'écurie, homme de service, cuisinier, bonne, domestique, servante, ouvrier de ferme, fileuse, cultivateur, etc.), la position ou grade de la personne énumérée étant toujours donnée en rapport à l'emploi, occupation ou profession.

12. Les entrées sous l'en tête d'employés à gages seront faites dans les colonnes 22 à 27 inclusivement, pour chaque personne nommée dans la colonne 3 qui est employée à quelque occupation industrielle ou autre et à laquelle est payé un salaire, des gages, ou autres émoluments en espèces pour ses services, qu'elle travaille à la pièce, à l'heure, à la journée, à la semaine ou au mois, à son domicile, dans une usine ou ailleurs.

13. Les colonnes 22, 23 et 24 ont particulièrement rapport aux employés des fabriques, et on se servira des lettres additionnelles "f" et "m" pour désigner si le lieu de l'emploi est la fabrique ou la maison, ou tous deux. Le trait vertical "( | ) f" dénote que la personne travaille de son métier à la fabrique ; "( | ) m" signifiera qu'elle travaille à la maison ; et "( | ) f m" signifiera que pendant l'année du recensement elle a travaillé partie du temps à la fabrique et partie chez elle. Les entrées dans les colonnes 23 et 24 montreront quelle partie de l'année, exprimée en mois, elle a été employée à son métier, à la fabrique et à la maison respectivement.

14. Dans la colonne 25 on entrera le nombre de mois pendant lesquels la personne a été employée autrement qu'à son métier propre dans la fabrique ou à la maison ; ou, si ce n'est pas un artisan, à quelle que soit son occupation, si elle est rémunératrice. Pour les fins du recensement les termes salaire et gages ont une signification commune, étant le montant ou somme d'argent qu'une personne employée par un autre reçoit pour ses services, que le travail fait soit professionnel, littéraire ou manuel.

15. Les colonnes 28 à 33 se rapportent à l'éducation et à la langue de chaque personne nommée dans le tableau, de l'âge de cinq ans ou plus. La colonne 28 se rapporte nécessairement aux personnes d'âge d'aller à l'école étant celles de plus de cinq ans et de moins de 21 ans. Si la personne a fréquenté l'école durant l'année de recensement le temps sera indiqué par le nombre de mois, et si il ou elle n'a pas fréquenté l'école pendant l'année ceci sera indiqué par un trait horizontal (—).

16. On répondra aux colonnes 29, 30, 31 et 32 par le chiffre 1 pour "Oui" et par le tiret (—) pour "Non" selon le cas ; et on ne devra pas tenir compte du degré d'avancement en ce qui concerne aucune des questions. L'anglais et le français ont été instituées langues officielles par l'article 133 de l'Acte de l'Amérique Britannique du Nord, 1867, et, par conséquent, on a pourvu spécialement dans le tableau à l'inscription de toutes personnes agées de 5 ans ou plus qui parlent l'une ou l'autre de ces langues, ou les deux, et dans chacun de ces cas la réponse "Oui" devra être entrée dans les deux colonnes.

17. La langue maternelle de chacun est la langue natale, la langue de sa race ; mais pas nécessairement, la langue dans laquelle il pense, ou qu'il parle le plus couramment, ou dont il se sert surtout dans la

conversation. Quelle qu'elle puisse être, anglaise, française, gaélique, irlandaise, allemande, suédoise, russe ou toute autre, elle devra être entrée par son nom dans la colonne 33 si la personne parle la langue, mais pas autrement.

68. Les infirmités sont inscrites sous les en-têtes des trois classes (a) Sourds-muets, (b) Aveugles, et (c) Aliénés. Il n'est pas nécessaire que le degré d'infirmité soit absolu ou total, mais il doit être suffisamment prononcé dans chacune de ces classes pour avoir atteint l'état d'incapacité. Si l'infirmité est congénitale (c'est-à-dire si elle est de naissance), ou si elle date de l'enfance, les mots "depuis l'enfance" devront être ajoutés, ainsi : Aveugle, depuis l'enfance. L'infirmité, lorsqu'elle existe chez une personne, sera inscrite par son nom dans la colonne 34 ; s'il n'en existe pas, l'entrée dans la colonne sera le trait (—) ou le signe habituel pour une négation.

69. Le sens littéral de l'expression *de jure* est "de droit", "légitimement", ou "légalement" ; mais le terme n'a pas, à proprement parler, de signification en loi. Ni les statuts ni les décisions des tribunaux ne donnent de définition exacte ou fixe de ce terme. Ainsi donc, lorsqu'il a été ordonné que l'énumération de la population serait faite d'après le système *de jure*, il y a lieu à des malentendus et erreurs, en dépit des instructions sur le sens usuel du terme.

70. Il y a une probabilité que quelques personnes soient comptées à deux endroits, et que d'autres ne soient pas comptées du tout. Une servante, par exemple, peut être inscrite à la demeure de ses parents comme membre de la famille de jure, et elle peut aussi être inscrite comme de jure du ménage où elle est employée. Ou si elle est absente de chez elle pour une période comparativement longue et qu'elle ne soit dans sa présente place de service que pour peu de temps, elle peut être omise complètement de l'énumération. La même chose peut arriver dans le cas de commis, commis aux ventes, artisans, journaliers, employés de chemin de fer, etc.

71. Il n'est pas possible de poser une règle applicable à chaque cas, mais, généralement, là où il y a doute, un renvoi aux noms des personnes qui sont temporairement absentes, citant le numéro de la page et la ligne dans le tableau n° 1, devra être inscrit dans la formule spéciale A en même temps que l'énumération est faite selon le tableau n° 1, et avec l'aide du renseignement ainsi obtenu une grande proportion des erreurs possibles peut être éliminée au Bureau du recensement.

72. L'énumérateur inscrira dans la formule spéciale A, le renvoi par numéro de la page et de la ligne dans le tableau n° 1, au nom de chaque membre de la famille ou ménage qui est donné comme absent du foyer ou domicile, et dont l'absence est considérée comme temporaire par le chef de la famille ou ménage (ou quiconque donne le renseignement).

73. Un étudiant au collège, un matelot ou pêcheur en mer, un exploitant de bois dans la forêt, un marchand ou commerçant en pays étranger, un commis voyageur sur la route, les internés dans les hôpitaux, les établissements pénitentiaires, etc., et autres personnes dont la période d'absence est plus ou moins définie et connue, devront être inscrits comme tels.

74. Mais dans le cas de personnes qui ont quitté le foyer ou domicile auquel elles appartenaient pour suivre quelque négoce ou occupation, ou pour commencer la vie à leur propre compte, dans une partie quelconque du Canada ou dans un autre pays, aucune entrée ne devra être faite par l'énumérateur soit dans le tableau n° 1, ou dans la formule spéciale, à moins que la date de son retour ne soit bien connue.

75. Si le chef de la famille ou du ménage (ou quiconque donne le renseignement) a quelque doute au sujet de l'intention de ces personnes de s'en revenir, et si elles sont absentes douze mois, elles ne doivent pas être prises dans le recensement par l'énumérateur, la présomption étant qu'elles se sont établies ailleurs.

76. Les personnes dans une famille ou ménage dont le foyer ou domicile est ailleurs ne doivent pas être inscrites par l'énumérateur, excepté dans les cas où elles déclarent leur intention de ne plus retourner dans leur foyer ; elles devront alors être inscrites dans le tableau n° 1, quelle que soit la durée de leur résidence dans la localité.

77. Dans le cas de chaque entrée dans la Formule Spéciale A, inscrivez dans les colonnes 1 et 2 le numéro de la page et de la ligne du tableau n° 1 où se trouve le nom d'une personne dont l'absence temporaire a été constatée ; le nombre de mois d'absence dans la colonne 3 ; dans la colonne 4, si la personne a l'intention de revenir ; dans la colonne 5, décrivez la "localité où la personne se trouve". Donnez (si au Canada) le nom de la province ou du territoire et de la cité, de la ville ou du village, avec la rue et le numéro de la maison, ou du canton, de la paroisse ou autre municipalité, avec concession et lot ou numéro de cadastre ; et aussi l'adresse du bureau de poste. Si c'est hors du Canada, donnez le nom du pays seulement, ou de l'Etat si c'est aux Etats-Unis.

78. Enquérez-vous du chef de chaque famille ou ménage (ou quiconque donne les renseignements) si quelque personne de la famille ou du ménage est temporairement absente, de manière que les inscriptions convenables concernant telle personne puissent être faites dans la Formule Spéciale A.

72. La section 13 de [illegible] impose aux chefs de familles, ménages et institutions l'obligation de donner à l'énumérateur tous les détails concernant chaque personne dans la famille, ménage ou institution, tel qu'exigé par le tableau. Il peut arriver cependant, dans le cas de pensionnaires, locataires et autres que le chef de la famille, ménage ou institution a entre de leur absence temporaire, soit dans l'impossibilité de donner les détails de renseignements nécessaires lors de la visite de l'énumérateur; on peut remédier à de tels cas, la formule spéciale B a été préparée. C'est une formule individuelle, semblable dans chaque détail au tableau n° 1, et sera laissée par l'énumérateur au chef de la famille, ménage ou institution, pour chaque telle personne, et devra être remplie à la date et l'heure indiquées par l'énumérateur et être remise par lui et insérée à sa place convenable dans le tableau n° 1.

73. Le paragraphe 17 de l'Acte de recensement statue que quiconque refuse volontairement ou sans excuse légitime, de remplir, ou négligeant de le remplir correctement et exactement, tout tableau qu'il a été requis de remplir par un énumérateur ou autre personne employée pour l'exécution de l'Acte, ou refuse ou néglige de le signer et remettre ou rendre quand il est requis, ou sciemment fait, signe, remet ou rend, ou fait faire, signer, remettre ou rendre une réponse ou énonciation fausse relativement à quelque renseignement que ce soit, demandé dans le dit tableau, est passible d'une amende d'une piastre à quarante piastres."

Ce volume du recensement traite entièrement de la population, et les tableaux qu'il contient sont groupés sous les cinq classes suivantes—

1. Tableau comparatif de la population.
2. Superficies, demeures, familles, population, sexe et état civil.
3. Population par religions.
4. Origines et nationalités.
5. Lieux de naissance et immigration.

I. Population de 1871, 1881, 1891 et 1901, comparée par districts électoraux tels que constitués en 1901, pages 2 à 5.

II. Demeures, familles et population en 1891 et 1901, comparées par districts de recensement tels que constitués en 1901, pages 6 à 9.

III. Sexe et état civil en 1891 et 1901, comparés par districts de recensement tels que constitués en 1901, pages 10 à 17.

IV. Population rurale et urbaine en 1891 et 1901, comparée par districts de recensement tels que constitués en 1901, pages 18 à 21.

V. Population des cités est des villes ayant plus de 5,000 habitants en 1901, comparée avec 1871–81–91, page 22.

Avec l'état comparatif de la population, le tableau I donne le chiffre de la représentation pour chaque district électoral du présent parlement, ainsi qu'un état général de la représentation durant la période de 1871 à 1901. La colonne ayant trait aux divorcés dans le tableau III ne contient pas de comparaison, vu que le recensement de cette classe a été pris pour la première fois en 1901. La population urbaine dans le tableau IV comprend toutes les personnes dont le lieu de résidence se trouve dans les villages incorporés, les villes et les cités. Le tableau V contient la population totale des villes incorporées et des cités ayant plus de 5,000 habitants, sans tenir compte du fait que leur population, dans certains cas, est tirée de deux districts électoraux ou plus.

Le second groupe comprend les tableaux suivants—

VI. Superficie des lacs du Canada par provinces et territoires, pages 20 à 25.

VII. Superficies, demeures, familles, population, sexe et état civil, en 1901, par districts et sous-districts, pages 28 à 142.

Les superficies dans les deux tableaux ont été préparées pour le bureau du recensement par M. James White, géographe du ministère de l'Intérieur, d'après les cartes

officielles les plus récentes et les données les plus complètes en possession du bureau des géographes. Mais dans la Nouvelle-Ecosse et les parties non-organisées d'Ontario et de Québec, où les sous-districts correspondent aux arrondissements de votation pour les fins électorales, les données nécessaires n'ont pu être obtenues pour établir les superficies par sous-districts.

Le tableau VII donne seulement les superficies des terres, et pour obtenir le total de la superficie des provinces et du Dominion il faut y ajouter la superficie des lacs telle que contenue dans le tableau VI. Toutes les eaux sujettes à la marée, telles que la Baie d'Hudson, la Baie d'Ungava, le golfe Saint-Laurent et la Baie de Fundy, ont été exclues, bien qu'il soit d'usage d'inclure dans la superficie du Dominion toute cette partie du fleuve Saint-Laurent située, au-dessus du méridien de la Pointe de Monts, dans le Saguenay, et quoique la marée atteigne jusqu'au lac Saint-Pierre. En ajoutant 2,967,556 acres à la superficie des lacs de Québec, et 124,362 acres[1] à celle d'Ontario, pour les parties du fleuve Saint-Laurent et des rivières Niagara, Détroit et Saint Clair, les superficies des terres et des eaux des différentes provinces et territoires du Dominion sont comme l'indique le tableau suivant :

| Provinces et Territoires. | Acres de terre. | Acres en lacs. | Total d'acres. | Total en milles carrés. |
|---|---|---|---|---|
| Colombie-Britannique | 236,922,177 | 1,560,830 | 238,483,007 | 372,630 |
| Manitoba | 41,169,698 | 6,019,290 | 47,188,298 | 73,732 |
| Nouveau-Brunswick | 17,863,266 | 47,232 | 17,910,498 | 27,985 |
| Nouvelle-Ecosse | 13,483,671 | 230,100 | 13,713,771 | 21,428 |
| Ontario | 141,125,330 | 25,826,306 | 166,951,636 | 260,862 |
| Ile du Prince-Edouard | 1,397,991 | .. | 1,397,991 | 2,184 |
| Québec | 218,723,687 | 6,475,874 | 225,198,561 | 351,873 |
| Alberta | 64,973,212 | 232,000 | 65,205,212 | 101,883 |
| Assiniboia | 56,498,546 | 384,000 | 56,882,546 | 88,879 |
| Saskatchewan | 66,460,859 | 2,414,500 | 68,875,359 | 107,618 |
| Athabaska | 155,622,704 | 5,635,120 | 161,257,824 | 251,965 |
| Mackenzie | 340,886,420 | 18,910,080 | 359,796,500 | 562,182 |
| Keewatin | 292,478,010 | 8,588,260 | 301,066,270 | 470,416 |
| Franklin | 320,000,000 | .. | 320,000,000 | 500,000 |
| Ungava | 223,429,300 | 3,745,740 | 227,175,040 | 354,961 |
| Yukon | 125,649,500 | 415,280 | 126,064,780 | 196,976 |
| Total | 2,316,684,071 | 80,483,222 | 2,397,167,293 | 3,745,574 |

Les superficies, dont celle de la Baie d'Hudson, située entre les territoires d'Ungava et de Keewatin, est de 284,000,000 acres, ou 443,750 milles carrés, et celle du golfe Saint-Laurent, située entre les provinces de Québec et la Nouvelle-Ecosse, qui est de 65,000,000 d'acres, ou 101,562 milles carrés, ne sont pas incluses dans la superficie du Dominion.

Le troisième groupe contient les tableaux suivants—

VIII. La population des provinces par religions, pages 144 à 145.

IX. Les religions principales par districts de recensement, pages 146 à 153.

X. La population par religions des sous-districts, pages 154 à 282.

[1] Cette superficie de 124,362 acres comprend 103,114 acres du fleuve Saint-Laurent, 4,288 acres de la rivière Niagara, 10,400 acres de la rivière Détroit et 6,560 acres de la rivière St. Clair.

Le premier de ces tableaux donne la population de 1901 classifiée en 45 religions spécifiées; le second est un tableau comparatif de neuf des principales religions pour 1881 et 1891; et le troisième donne la population de 1901, par sous-districts, classifiée en 30 religions spécifiées.

Le quatrième groupe comprend les tableaux suivants—

XI. Les origines par sous-districts, pages 284 à 405.
XII. Les nationalités par districts de recensement, pages 406 à 413.

Selon l'usage des termes du recensement (voir pages 53 et 54 des Instructions) le mot "origine" signifie la race ou la tribu à laquelle une personne appartient ou dont elle descend; le mot "nationalité" signifie le pays auquel cette personne doit allégeance. Toute personne dont la demeure est au Canada, ayant des droits de citoyenneté, soit par naissance ou naturalisation, appartient à la nationalité Canadienne, quels que soient son origine et son lieu de naissance.

Le cinquième groupe comprend les tableaux suivants—

XIII. Lieux de naissance par provinces, pages 416 et 417.
XIV. Lieux de naissance par districts, pages 418 à 447.
XV. Lieux de naissance et citoyenneté des immigrés par provinces, pages 448 et 449.
XVI. Population immigrée par provinces, pages 450 et 451.
XVII. Population immigrée par districts, pages 452 à 481.
XVIII. Population par lieux de naissance, 1881, 1891, 1901, page 482.

Le tableau XV indique le nombre d'immigrés qui se sont fait naturaliser, et le tableau XVIII la population totale du Canada par lieux de naissance d'après les recensements de 1881, 1891 et 1901.

Pour ce qui concerne l'orthographe des noms géographiques contenus dans ce volume, l'autorité du Bureau des Géographes du Canada a été suivie, tel que prescrit par Arrêté du Conseil en date du 18 décembre, 1897.

ARCHIBALD BLUE.
*Commissaire spécial du recensement.*
